Environmental Ethics Policy 3rd Edition:

Gary Bryner, The Historical Dictionary of Environmentalism strategically skips across issues concepts time organizations and cultures not with any pretense of producing a definitive dictionary but rather with the aim of producing an inclusive wide ranging and global history of environmentalism This is done through a chronology a list of acronyms and abbreviations an introductory essay and over 300 cross referenced dictionary entries The Environmental Ethics and Policy Book Donald VanDeVeer,Christine Pierce,1998 This text and sourcebook crosses disciplinary boundaries and attends seriously to economic reasoning and its implications for environmental policy issues while taking a broad view of questions of ethics It is appropriate and valuable not only for philosophy and environmental science students but also for students of economics biology engineering and public policy Environmental Ethics Michael Boylan,2022-03-15 The latest edition of an essential resource in the theory and applications of environmental ethics In the newly revised Third Edition of Environmental Ethics internationally renowned philosopher Michael Boylan delivers another accessible introduction for students new to ethics and an invaluable reference for scholars of all levels The anthology includes important essays both established and contemporary as well as eight brand new contributions commissioned specifically for this edition This new material is the foundation for students understanding of the most recent ethical debates on the environment and humanity s place within it The balanced combination of new material on recent developments in the field and well known foundational articles appears alongside helpful pedagogical materials including case studies and sample questions The book brings students up to speed on all the main themes in the area including worldview arguments for environmentalism the anthropocentric vs biocentric debate and a variety of applied environmental problems Environmental Ethics also offers A thorough introduction to the theoretical background of environmental ethics including discussions of ethical reasoning nature and the tragedy of the commons Comprehensive explorations of eco feminism and social justice aesthetics and deep ecology Practical discussions of anthropocentric and biocentric justifications in environmental ethics In depth examinations of applied environmental problems including climate change animal rights sustainability and public policy Perfect for undergraduate and graduate students studying topics in ethics the environment law and policy Environmental Ethics will also earn a place in the libraries of philosophers with an interest in applied or environmental ethics and industry consultants to ecologists environmental scientists or environmental policymakers **African Philosophy and Environmental Conservation** Jonathan Chimakonam,2017-10-04 African Philosophy and Environmental Conservation is about the unconcern for and marginalisation of the environment in African philosophy The issue of the environment is still very much neglected by governments corporate bodies academics and specifically philosophers in the sub Saharan Africa The entrenched traditional world views which give a place of privilege to one thing over the other as for example men over women is the same attitude that privileges humans over the environment This culturally embedded orientation makes it difficult for stake holders in Africa to identify and

confront the modern day challenges posed by the neglect of the environment In a continent where deep rooted cultural and religious practices as well as widespread ignorance determine human conduct towards the environment it becomes difficult to curtail much less overcome the threats to our environment It shows that to a large extent the African cultural privileging of men over women and of humans over the environment somewhat exacerbates and makes the environmental crisis on the continent intractable For example it raises the challenging puzzle as to why women in Africa are the ones to plant the trees and men are the ones to fell them Contributors address these salient issues from both theoretical and practical perspectives demonstrating what African philosophy could do to ameliorate the marginalisation which the theme of environment suffers on the continent Philosophy is supposed to teach us how to lead the good life in all its forms why is it failing in this duty in Africa specifically where the issue of environment is concerned This book which trail blazes the field of African Philosophy and Environmental Ethics will be of great interest to students and scholars of Philosophy African philosophy Environmental Ethics and Gender Studies

motivates us to care for creation And yet both in society in general as well as in the Christian church in particular we cannot seem to agree on what to do regarding environmental issues In this book climate scientist Johnny Wei Bing Lin argues that determining the content of environmental stewardship far from being a straightforward exercise is a difficult and complex endeavor He sets forth a general taxonomy drawing from worldviews ethical theories science epistemology science policy studies politics and economics that can help us better understand what excellent creation care consists of and how to bridge the differences people have regarding environmental issues

Corporate Environmental Reporting Leanne J

Morrison,2019-07-04 This book explores corporate environmental discourse by examining a sample of corporate environmental reports through the lens of environmental philosophy Findings include the predominant use of a dualistic approach towards nature which highlights the perceived separateness of companies from the natural world Also explored are the corporate articulations of interconnectivity and transcendence two philosophical approaches that are also in common use in western culture The expression of these themes reveals the discursive underpinnings of a harmful relationship with nature Exploring the ways in which discourse informs corporate relationships with nature allows for an in depth diagnosis of current environmental problems The history of environmental philosophy demonstrates how some powerful philosophical approaches have shaped the western relationship with nature over time and continue to do so through corporate environmental reporting Corporate Environmental Reporting The Western Approach to Nature demonstrates how corporate reporting is used to reduce the perception of the corporate responsibility and contributes to the erosion of broader cultural restraints against the harmful treatment of nature As such discourse is integral to the survival of the world which we and other members of our biotic community are utterly reliant on It shows the latest state of knowledge on the topic and will be of interest both to students at an advanced level academics and reflective practitioners It will be of interest to researchers academics and students in the fields of accounting management environmental philosophy and sustainable management

Introduction to the Environmental Humanities J. Andrew Hubbell,John C.

Ryan,2021-09-14 In an era of climate change deforestation melting ice caps poisoned environments and species loss many people are turning to the power of the arts and humanities for sustainable solutions to global ecological problems

Introduction to the Environmental Humanities offers a practical and accessible guide to this dynamic and interdisciplinary field. This book provides an overview of the Environmental Humanities evolution from the activist movements of the early and mid twentieth century to more recent debates over climate change sustainability energy policy and habitat degradation in the Anthropocene era. The text introduces readers to seminal writings artworks campaigns and movements while demystifying important terms such as the Anthropocene environmental justice nature ecosystem ecology posthuman and non human. Emerging theoretical areas such as critical animal and plant studies gender and queer studies Indigenous studies and energy studies are also presented. Organized by discipline the book explores the role that the arts and humanities play in the future of the planet. Including case studies discussion questions annotated bibliographies and links to online resources this book offers a comprehensive and engaging overview of the Environmental Humanities for introductory readers. For more advanced readers it serves as a foundation for future study projects or professional development.

Climate Justice S. M. Ravi Kanbur, Henry Shue, 2019. Climate justice requires sharing the burdens and benefits of climate change and its resolution equitably and fairly. This book brings together economic and philosophical discourse on climate justice in order to support public policy dialogue on the topic.

The Bioethics of Space Exploration Konrad Szocik, 2023. The Bioethics of Space Exploration provides a comprehensive discussion of the possible bioethical issues and challenges that may arise when considering future long term space missions. Because of numerous threats within the space environment many consider the concept of radically modifying humans to be a serious and perhaps even necessary option. Konrad Szocik presents what types of ethical and bioethical challenges may await participants on commercial scientific and colonizing missions and provides a new perspective into the potential for radical biomedical technologies.

African Philosophy and Deep Ecology Kenneth Uyi Abudu, Kevin Gary Behrens, Elvis Imafidon, 2025-07-11. This book investigates African philosophical contributions to the concept of deep ecology which advocates for rethinking human and non human relationships within our ecosystems by promoting the inherent and earned worth of all beings. With ecological crises impacting lives around the world this book interrogates deep ecology thinking from African philosophical perspectives highlighting the continent's important ontological epistemological ethical aesthetic and broad philosophical contributions. The book investigates issues such as the eco phenomenology of human non human animals relations Ubuntu and the environment the superiorist fallacy environmental belongingness the impact of colonization and modernity on non human trauma the politics of ecological narrative about African places the question of moral status African socialist perspectives the question of degrowth selective subordination biodiversity loss land ethics the ontology of waste and the concept of personhood in relation to global climate and ecological justice. Providing a significant intervention in our understanding of the ecological crises and our duties toward ecosystems and the non human other in the twenty first century this book is an important read for researchers advocates and other stakeholders working in the fields of environmental philosophy climate change indigenous studies and African Studies.

Encyclopedia of Global Justice Deen K. Chatterjee, 2012-01-23 This two volume Encyclopedia of Global Justice published by Springer along with Springer's book series Studies in Global Justice is a major publication venture toward a comprehensive coverage of this timely topic. The Encyclopedia is an international interdisciplinary and collaborative project spanning all the relevant areas of scholarship related to issues of global justice and edited and advised by leading scholars from around the world. The wide-ranging entries present the latest ideas on this complex subject by authors who are at the cutting edge of inquiry. The Encyclopedia sets the tone and direction of this increasingly important area of scholarship for years to come. The entries number around 500 and consist of essays of 300 to 5000 words. The inclusion and length of entries are based on their significance to the topic of global justice regardless of their importance in other areas. [Connection to Nature, Deep Ecology, and Conservation Social Science](#) Christian Diehm, 2020-12-15 In Connection to Nature Deep Ecology and Conservation Social Science Human Nature Bonding and Protecting the Natural World Christian Diehm analyzes the relevance of the philosophy of deep ecology to contemporary discussions of human nature connectedness. Focusing on deep ecologists' notion of identification with nature, Diehm argues that deep ecological theory is less conceptually problematic than is sometimes thought and offers valuable insights into what a sense of connection to nature entails, what its attitudinal and behavioral effects might be, and how it might be nurtured and developed. This book is closely informed by and engages at length with conservation social science, which Diehm draws on to assess the claims of deep ecology theorists, resolve long-standing problems associated with their work, investigate the impacts of time outdoors on human nature bonding, and critically review the biophilia hypothesis. Emphasizing the foundational role of ecologically inclusive identities in pro-environmental attitudes and behaviors, Diehm demonstrates that having a sense of connection to nature is more important than many environmental advocates have realized and that deep ecology has much to add to the increasingly pressing conversations about it.
