Handbook of Energy and Environmental Security Muhammad Asif, 2022-05-10 Handbook of Energy and

Environmental Security educates the reader about the wider dimensions of the distinctive yet intertwined subjects of energy security and environmental security. The book uniquely addresses these two increasingly important topics in a comprehensive and composite manner describing the concepts and wider dimensions of energy and environmental security in technological, economic, social and geopolitical perspectives. Divided into three main parts, the book deals with the subject of energy security in terms of its concepts, broader dimensions and allied issues; focuses on environmental security and covers subjects in a cohesive manner discussing their important interfaces and commonalities. Providing valuable scholarship for academics, researchers and analysts in the fields of energy and the environment and using case studies to illustrate national and international levels, this is a valuable resource for energy and environmental security challenges, especially in the areas of sustainable development and climate change. Discusses the critical subjects of energy security and environmental security in a composite manner. Incorporates up to date data, case studies and comparative assessments. Energy and environmental policy frameworks are covered from the perspective of both developed and developing countries. *Environmental Security* Richard A. Matthew, 2015. The literature compiled in this four volume collection explores the real and potential linkages between environmental change and security. Early formulations of environmental security date to antiquity whilst contemporary formulations of environment conflict peace linkages grew in part from the environmental movement of the 1960s and 1970s. The ensuing flood of academic enquiry has been diverse and extensive and the objective of this major work is to organize this important but polysemous literature in order to provide a comprehensive **Environmental Security:**

Rethinking security in response to environmental change Richard A. Matthew, 2015 *Environmental Security: The security implications of climate change* Richard A. Matthew, 2015 **Environmental Security in Africa** Elisha Jasper

Dung, Leonard Sitji Bombom, Augustine Avwunudiogba, 2024-08-19. *Environmental Security in Africa: Conflicts, Politics and Development* investigates the nature, scope and dimension of environmental security in Africa from a multidisciplinary perspective to examine the history, theories, spatial patterns, sociocultural, socioeconomic consequences and legal ramifications of Africa's environmental concerns. This book is grounded in theories that cut across the social, behavioral and environmental sciences, arguing that environmental security is a multifaceted subject intricately linked to global climate change and magnified by globalization. Drawing from case studies across different parts of Africa, Elisha Jasper Dung, Leonard Sitji Bombom, Augustine Avwunudiogba and the contributors argue that the integral part of the solution to Africa's environmental security issues are entrenched in victims' local, regional, social, cultural, political and economic circumstances in specific geographical locations such as Nigeria, Northeast Africa, Kenya and South Sudan. Comprised of 17 chapters, this book

provides a unique perspective that facilitates understanding the complex problem of environmental security and its sundry ramifications for scholars and policymakers
