Epa Suppressed Climate Report:

The Inquisition of Climate Science James Lawrence Powell, 2011 Modern science is under the greatest and most successful attack in recent history An industry of denial abetted by news media and information broadcasters has duped the American public into rejecting an overwhelming body of rigorously vetted scientific evidence showing that human caused carbon based emissions are linked to warming the Earth *The Inquisition of Climate Science* is the first book to comprehensively take on the climate science denial movement and the deniers themselves exposing their lack of credentials their extensive industry funding and their failure to provide any alternative theory to explain the observed evidence of warming In this book readers meet the most prominent deniers while dissecting their credentials arguments and lack of objectivity James Lawrence Powell exhibits deniers wide variety of deceptive rhetorical techniques many stretching back to ancient Greece Carefully researched fully referenced and compellingly written his book clearly proves the evidence of global warming is real

Change You Can Really Believe in Joseph Toomey, 2012-04 No President in living memory has entered office with a greater amount of goodwill and broad bipartisan support than Barack Obama And few Presidents in living memory had arrived in Washington proclaiming such dramatically articulated vows to change the tone of politics to usher in an era of post partisanship in an effort to rally the nation behind his plan of enacting an ambitious program of social and economic change He vowed to enact a broad bipartisan agenda for health care reform energy transformation economic revitalization job growth and restoration of America's standing in the world And no President in living memory has more quickly and more completely abandoned his promises He enacted a health care plan that far more resembled plans he had bitterly criticized his opponents for supporting rather than the one his campaign outlined His promised job growth through economic stimulus measures drove up the unemployment rate to double digits leading to millions of job losses His vows to restore fiscal probity resulted in the most ruinous deficits and public debt in U S history His green energy program collapsed into a cesspool of crony political favoritism His vows to restore relations with hostile nations like Iran and North Korea had only deepened those nations disdain for America Despite his harsh criticisms Obama adopted nearly every plank in the Bush era anti terror policy His promise to restore science to its rightful place resulted in the most rigidly inflexible program of ideological extremism in modern memory Even more noteworthy was the fact that the new era of post partisanship he had vowed to create in Washington resulted in the worst political gridlock in living memory This book examines in detail hundreds of campaign promises Obama made while running for President contrasting those with the record of failure and broken promises left in his wake It is a story that has received too little attention until now
