

# Quick Setup

Before using the projector, read these instructions and the safety instructions in the User's Guide on your projector CD-ROM.

## 1 Unpack the projector

You should have the following items:

Canada only: For French speakers, remove sticker(s) from the interface label backing sheet and place over corresponding text on the control panel.

## 2 Choose a location

The projector supports 4 viewing setups: front projection, ceiling projection, rear projection, and rear-screen projection. Choose the best one for your environment. If you install the projector in a rear or rear-screen position, you'll need to choose the correct projection option from the **Extended** menu. See the User's Guide on your CD-ROM for instructions.

The distance between the projector and the screen generally determines the size of the image, but the size can also vary depending on the aspect ratio (image shape), how you hold the image, and whether you're using other image settings. Depending on the projector model you are using and the image settings you're choosing, you can place the projector anywhere from 33 to 472 inches (84 to 1200 cm) from the screen.

Use the tables in the User's Guide or the Image Size calculator on the Multimedia Projection page on Epson's website to help you determine the proper projection distance.

## 3 Plug in and turn on

- 1 Open the A/V Mute slide (see cover).

- 2 Connect the power cord to the projector and plug the other end into an electrical outlet.

The **O** power light on the projector turns orange.

- 3 Turn on your computer or video source.
- 4 Press the **O** power button on the projector or remote control. The projector beeps, the **O** power light flashes green, and the projector starts up. When the **O** power light stays green, the projector is ready for use.

### Turning off the projector

- 1 If you're using a computer, shut it down first, while you can still see the display.
- 2 Press the **O** power button on the projector or remote control.
- 3 When you see the confirmation message, press the **O** power button again. The projector beeps twice and the **O** power light turns orange.

With Epson's Instant OFF technology, there's no cool-down period. When you're done, just unplug the projector and it's ready to leave.

## 4 Set up the remote control

- 1 Remove the battery cover.
- 2 Insert the batteries.
- 3 Replace the battery cover.

## 5 Connect your video source

Follow these instructions to connect the projector to your computer using the USB cable (Windows® only), or to your video equipment using an HDMI cable (EX70 only) or component video cable. For instructions on using other connection options, see the User's Guide on your CD-ROM.

### Connecting with a USB cable

If you're connecting a Windows® Vista®, XP, or 2000 computer to the projector, you can use the USB cable. You don't need to use the VGA cable.

- 1 Make sure the projector is turned on.
- 2 Turn on your computer.
- 3 Connect the square end of the USB cable to the projector's **Type-B** USB port.
- 4 Connect the flat end of the cable to any available USB port on your computer.

- 5 Follow the instructions on your computer screen to install the Epson USB Display software (you need to install the software only the first time you connect). After the software has been installed, you see your computer's screen displayed by the projector.

If you see a "Digital Signature Warning" while installing the software, select **Continue**.

You can connect an optional audio cable if you want to play sound through the projector. See the User's Guide on your CD-ROM for instructions.
