pathways between the two variables In their chapter Arun S Karlamangla Tara L Gruenewald and Teresa E Seeman outline the potential of biomarkers such as cholesterol heart pressure and C reactive protein to assess and indicate the factors underlying health Edith Chen Hannah M C Schreier and Meanne Chan reveal the empirical power of biomarkers by examining asthma a condition steeply correlated with socioeconomic status Their analysis shows how stress at the individual family and neighborhood levels can increase the incidence of asthma The volume then turns to cognitive neuroscience using biomarkers in a new way to examine the impact of poverty on brain development Jamie Hanson Nicole Hair Amitabh Chandra Ed Moss Jay Bhattacharya Seth D Pollack and Barbara Wolfe use a longitudinal Magnetic Resonance Imaging MRI study of children between the ages of four and eighteen to study the link between poverty and limited cognition among children Michelle C Carlson Christopher L Seplaki and Teresa E Seeman also focus on brain development to examine the role of socioeconomic status in cognitive decline among older adults Featuring insights from the biological and social sciences *Biological Consequences of Socioeconomic Inequalities* will be an essential resource for scholars interested in socioeconomic disparities and the biological imprint that material deprivation leaves on the human body *Principles and Practice of Environmental Medicine* A.B.
