**The Impacts of Automotive Plant Closure** Andrew Beer, Holli Evans, 2013-09-13 Economic restructuring has been a notable feature of so called mature industrial economies such as the UK and Australia in the last two decades with deregulation privatisation technological change and globalisation combining to reshape such economies Some industries have grown while others have declined Moreover while overall employment in the UK and Australia has grown many newly created positions require skills not found in the industries shedding labour or are in casualised and low paid occupations Many lesser skilled workers leaving declining industries are therefore at risk of long term unemployment or leaving the workforce entirely Both mental and physical health can be affected after redundancy It is therefore crucial that the measures put in place in many domains of social policy such as formal health policy employment assistance community development housing assistance and so on to adequately address the difficulties confronting this group This volume takes a closer look at the impact of manufacturing notably automotive plant closures in the UK Birmingham and Australia Adelaide in recent years and policy responses to those closures It attempts to tease out differences in policy response and effectiveness and attempts to identify areas where policy could be made to work better in terms of adjusting to large scale manufacturing change and resulting job losses In so doing it begins for the first time we believe to take a comparative approach to understanding the impact of plant closures and policy responses This book was published as a special issue of Policy Studies

**Financialization and Strategy** Julie Froud, Sukhdev Johal, Adam Leaver, Karel Williams, 2006-04-18 Considering the recent impact of the capital market on corporate strategy this text analyzes through argument and supportive case studies how pressures from the capital bull market of the 1990s and bear market of the early 2000s have reshaped management action and calculation in large publicly quoted US and UK corporations Beginning with the dissatisfaction with classical strategy and its limited engagement with the processes of financialization the book moves on to cover three detailed company case studies General Electric Ford and GlaxoSmithKline which use long run financial data and analysis of company and industry narratives to illustrate and explore key themes The book emphasizes the importance of company and industry narrative while also analyzing long term financial results and helps to explain the limits of management action and the burden of expectations placed on corporate governance Presenting financial and market information on trajectory in an accessible way this book provides a distinctive critical social science account of management in large UK and US corporations and it is a valuable resource for students scholars and researchers of business management political economy and non mainstream economics short listed for the 2007 IPEG Book Prize

The Automotive Industry and European Integration A. J. Jacobs, 2019-08-07 This book chronicles the divergent

growth trends in car production in Belgium and Spain It delves into how European integration high wages and the demise of GM and Ford led to plant closings in Belgium Next it investigates how lower wages and the expansion strategies of Western European automakers stimulated expansion in the Spanish auto industry Finally it offers three alternate scenarios regarding how further EU expansion and Brexit may potentially reshape the geographic footprint of European car production over the next ten years In sum this book utilizes history to help expand the knowledge of scholars and policymakers regarding how European integration and Brexit may impact future auto industry investment for all EU nations *Business Week* ,2004

Explaining EU Internal Security Cooperation Mark Rhinard,Raphael Bossong,2017-12-22 Internal security is often hailed as a rapidly expanding area of European integration with a growing number of strategies policies and framework agreements in recent years Yet actual cooperation when viewed closely proceeds at a halting pace raising questions as to why cooperation appears so problematic This book presents a novel theoretically informed way to understand internal security cooperation in Europe The approach treats internal security as a public good requiring collective action amongst sovereign governments All governments must contribute to the production of a public good once produced the public good benefits all governments Fundamental obstacles to producing a public good thus arise and can help explain the underlying difficulties facing European cooperation on internal security matters The chapters in this book apply a public goods approach to different internal security issues ranging from terrorism to border management and from environmental security to natural disasters Each study demonstrates how the various goals of internal security cooperation resemble different forms of public goods and thus present different kinds of obstacles to effective cooperation This book fills a theoretical gap in the literature on European internal security cooperation with a proven approach increasingly used in other scholarly fields This book was published as a special issue of *European Security* **Strategic Management** John A.
