 Douglas C. West, John Battice Ford, Essam Ibrahim, 2015 This text discusses how companies create competitive advantage
 through strategic marketing Using established frameworks and concepts it examines aspects of marketing strategy and
 thinking It provides examples to facilitate the understanding of theoretical concepts **The Business of Gamification**
 Mikolaj Dymek, Peter Zackariasson, 2016-09-13 At the turn of the century the term gamification was introduced as a concept
 to understand the process of using game mechanics in non game contexts The impact of gamification was soon evident to
 business practices where it had impact both on marketing and more broadly on the organizations themselves As the number
 of individuals playing video games grows there seem to be an acceptance of game mechanics elsewhere Its effectiveness is
 highly dependent on both technical possibilities and cultural acceptance two factors present today The aim of The Business of
 Gamification is to critically analyze the practical and theoretical consequences of gamification Practically how has
 gamification been applied in businesses to this point and what are the future scenarios Theoretically what are the
 contributions of gamification to existing academic knowledge How does this change our understanding of how business are
 performing and its consequences for organizations consumers and society in general This edited volume contains new and
 stringent perspectives on how gamification is contextualized in business settings both in theory as well as in practice This
 book will provide a wealth of research for individuals seriously interested in the industry at the academic level As a result
 this book will serve as a reference in curricula associated with video game development for years to come Mobilizing for
 Development Kristen E. Looney, 2020-05-15 Mobilizing for Development tackles the question of how countries achieve rural
 development and offers a new way of thinking about East Asia's political economy that challenges the developmental state
 paradigm Through a comparison of Taiwan 1950s 1970s South Korea 1950s 1970s and China 1980s 2000s Kristen E Looney
 shows that different types of development outcomes improvements in agricultural production rural living standards and the
 village environment were realized to different degrees at different times and in different ways She argues that rural
 modernization campaigns defined as policies demanding high levels of mobilization to effect dramatic change played a
 central role in the region and that divergent development outcomes can be attributed to the interplay between campaigns

and institutions The analysis departs from common portrayals of the developmental state as wholly technocratic and demonstrates that rural development was not just a byproduct of industrialization Looney s research is based on several years of fieldwork in Asia and makes a unique contribution by systematically comparing China s development experience with other countries Relevant to political science economic history rural sociology and Asian Studies the book enriches our understanding of state led development and agrarian change

Industrialization and Assimilation Elliott D. Green,2022-12-22

Industrialization and Assimilation examines the process of ethnic identity change in a broad historical context Green explains how and why ethnicity changes across time showing that by altering the basis of economic production from land to labour and removing people from the idiocy of rural life industrialization makes societies more ethnically homogenous More specifically the author argues that industrialization lowers the relative value of rural land leading people to identify less with narrow rural identities in favour of broader identities that can aid them in navigating the formal urban economy Using large scale datasets that span the globe as well as detailed case studies ranging from mid twentieth century Turkey to contemporary Botswana Somalia and Uganda as well as evidence from Native Americans in the United States and the M ori in New Zealand Industrialization and Assimilation provides a new framework to understand the origins of modern ethnic identities
