of India *Teaching and Learning Secondary School Mathematics* Ann Kajander, Jennifer Holm, Egan J Chernoff, 2018-10-24

This volume brings together recent research and commentary in secondary school mathematics from a breadth of contemporary Canadian and International researchers and educators. It is both representative of mathematics education generally as well as unique to the particular geography and culture of Canada. The chapters address topics of broad applicability such as technology in learning mathematics, recent interest in social justice contexts in the learning of mathematics as well as Indigenous education. The voices of classroom practitioners, the group ultimately responsible for implementing this new vision of mathematics teaching and learning, are not forgotten. Each section includes a chapter written by a classroom teacher, making this volume unique in its approach. We have much to learn from one another, and this volume takes the stance that the development of a united vision, supported by both research and professional dialog, provides the first step.

Education in Cambodia Vincent McNamara, Martin Hayden, 2022-05-14 This book is the most comprehensive account yet published about the education system in Cambodia It covers all system levels and draws upon the knowledge and insights of a wide range of leading Cambodian and foreign scholars The book focuses on how the system has developed and is making progress Significant achievements over the past two decades are evident but many problems remain including the poor quality of teaching research and institutional management Under funding is an ongoing obstacle but so too is a bureaucratic culture of resistance to change a history of weak governance and an anti reform sentiment deriving from a teacher centred and exam driven curriculum Achieving international standards must now be the system s highest priority To this end the system must rid itself of conservatism complacency and manipulation by parochial vested interests

Accountability in education: meeting our commitments UNESCO, 2017-10-30 The second edition of the Global Education Monitoring Report GEM Report presents the latest evidence on global progress towards the education targets of the UN Sustainable Development Goals With hundreds of millions of people still not going to school and many not achieving minimum skills at school it is clear education systems are off track to achieve global goals The marginalized currently bear the most consequences but also stand to benefit the most if policy makers pay sufficient attention to their needs Faced with these challenges along with tight budgets and increased emphasis on results oriented value for money countries are searching for solutions Increased accountability often tops the list The 2017 8 GEM Report shows the entire array of approaches to accountability in education

It ranges from countries unused to the concept where violations of the right to education go unchallenged to countries where accountability has become an end in itself instead of a means to inclusive equitable and high quality education and lifelong learning for all The report emphasizes that education is a shared responsibility While governments have primary responsibility all actors schools teachers parents students international organizations private sector providers civil society and the media 0 3 have a role in improving education systems The report emphasized the importance of transparency and availability of information but urges caution in how data are used It makes the case for avoiding accountability systems with a disproportionate focus on narrowly defined results and punitive sanctions In an era of multiple accountability tools the report provides clear evidence on those that are working and those that are not Back cover **Pacific Rim Objective**
