

Population

People are regarded as the greatest assets of the country. This is because people by putting in their labour and expertise play an important part in the development of the economy and of society. For example, minerals such as coal and iron ore become important only when they are put to use by humans. The census of India gives us information about the total population and its various other aspects.

Population Size and Distribution

Population Size

- On March 2001, India's population was 1,028 million which is about 16.7% of the world population.
- Uttar Pradesh, with a population of 166 million, is the most populous state of India. The state accounts for 16% of the total population of the country.
- Sikkim has a population of about 0.5 million people, and Lakshadweep has only 60,000 people.
- It is important to note that nearly half of the population of India lives in five states—Uttar Pradesh, Maharashtra, Bihar, West Bengal and Andhra Pradesh.
- Rajasthan, the largest state in India, has only 5.5% of the total population of the country.

Population Density

- Population density refers to the number of persons occupying or living in per unit of area. India is one of the highly densely populated countries.
- In 2001, the population density of India was 324 persons/sq km.
- While the population density was as high as 904 persons/sq km in West Bengal, it was as low as 13 persons/sq km in Arunachal Pradesh.
- States which have rugged land and unfavorable climatic conditions are sparsely populated. On the contrary, flat plains with moderate climate have high density of population.
- While Sikkim and Mizoram are sparsely populated, West Bengal and Bihar are densely populated.
