McNamara, Martin Hayden, 2022-05-14 This book is the most comprehensive account yet published about the education system in Cambodia It covers all system levels and draws upon the knowledge and insights of a wide range of leading Cambodian and foreign scholars The book focuses on how the system has developed and is making progress Significant achievements over the past two decades are evident but many problems remain including the poor quality of teaching research and institutional management Under funding is an ongoing obstacle but so too is a bureaucratic culture of resistance to change a history of weak governance and an anti reform sentiment deriving from a teacher centred and exam driven curriculum Achieving international standards must now be the system s highest priority To this end the system must rid itself of conservatism complacency and manipulation by parochial vested interests **Inside Education** Stephen

O'Brien, 2015-12-22 To learn more about learning what it is and how it works it is necessary to look inside education Inside Education takes the reader on a journey of four live education projects the first all Irish speaking mixed gendered multi faith primary school in the Republic of Ireland ideally suited to exploring learning identity an alternative post primary school for those who leave or are left behind by the formal education system also based in the Republic of Ireland and ideally suited to exploring personal learning an early college school that enables students to simultaneously sit their high school diploma and college exams based in Queens New York and ideally suited to exploring learning success and an adult education training centre that works with landless movement members based in Brazil and ideally suited to exploring learning power Using a critical ethnography approach each research narrative naturally unfolds enfolds to tell a more complete learning story All those interested in education are primed readers By re viewing their own learning outlook they may begin to advance deeper critical ideas and debates in education They may come to re represent education reminding public consciousness of its human stories as well as its curious intricate and powerful qualities And they may re discover other roads to raise a scholar Teachers educational researchers parents and guardians will be particularly interested readers Inside Education is a thought provoking challenging and revealing journey inside the world of education and learning Its exploration of school and classroom practices in a range of different settings provides important insights into how we learn a central aspect of our education system which remains overlooked and understudied In doing so it lays down a challenge to policy makers and educators everywhere to think differently about the way we learn and ultimately help students fulfil their real potential Carl O'Brien Chief Reporter for The Irish Times Inside Education is a stunning example of passionate scholarship that nonetheless refuses a redemptionist stance The ethnography captures people and contexts and draws the reader into the four sites of learning in fluent and lyrical prose This is facilitated by the extensive use of research notes deploying historical comparative literary artistic and scholarly sources Denis O Sullivan Emeritus Professor of Education University College Cork Ireland
