## **Guide To Prioritizing:**

Prioritizing Your Work and Life Lawrence S Scott, 2022-11-04 Do you ever feel like you're spinning plates? We're not speaking in literal terms of course unless you happen to be a circus performer. Instead, we're referring to those hair-pulling moments in life and especially at work when it feels like you've got a million things to do at once and you need to keep them all in balance. But you can't just let a single plate drop because that could lead to a catastrophic domino effect resulting in well a lot of smashed plates. No, to keep every single one of those plates spinning, you need to know where to direct your attention and when. It's here that we come to that magical and seemingly mythical term: prioritization. It's something we all know we should be doing. But implementing a system that works? That's another matter entirely. Read along as I'll be talking more on Prioritization and how you can Prioritize your work and life.

**Prioritizing Global Responsibilities** Luke Glanville, James Pattison, 2024-06-24 States face multiple ongoing and emerging challenges from climate change to global disease, mass atrocities to forced displacement, humanitarian crises to entrenched global poverty and are constrained by material and political limits to the amount of resources that they can devote to these issues. How should states decide which issues to prioritize and which crises to address? *Prioritizing Global Responsibilities* answers this question by proposing a two-level account of just prioritization that aims to be both philosophically sound and practically relevant. The authors assess several potential prioritization principles including diversification, culpability, urgency, disadvantage, and national interest and argue that states should prioritize issues where they can assist most effectively and where they can help those who are most underprivileged.

**Student-Led Assessment** Starr Sackstein, 2024-01-03 The single greatest authority on student learning is the student doing the learning, but the right structures must be in place for students' voices to be clearly heard and truly valued. Conventional formative and summative assessment are most often conducted through one-size-fits-all quizzes and tests that yield narrow, predetermined categories of data about students' academic progress. But if we want a truly accurate look at what, how, and to what extent students are learning, who's better to consult than the obvious experts on the matter: the students themselves. In this lively and comprehensive guide, veteran teacher and author Starr Sackstein provides the tools needed to help students compile and present evidence of learning through portfolios and student-led conferences, from templates and rubrics to personal testimonials, reflection questions, and activities. The book features forms applicable across grade levels and content areas for unpacking standards, co-constructing success criteria with students, evaluating current classroom practices, and more. Real-life perspectives and scenarios from educators in the field who have embraced portfolios and student-led conferences over standardized tests and letter grades. Practical, experience-based guidance for building classroom and schoolwide learning cultures that promote both learner agency and academic achievement. The resources, recommendations, and reflections in *Student-Led Assessment* allow educators at all levels to develop systems and protocols for ensuring student ownership of and pride in their own hard-won achievement.
