Your Quake LED JL headlights come standard with high/low beams and also feature RGB Accenting and Sequential Amber Turn Signals! We advise to take advantage of these great features and use them.

Keep in mind that you should route any wires that is safe, dry and clear of moving or rotating parts or any excessive heat sources. Excessive or prolonged heat can damage the protection wire loom leading to wire chaffing that could break wires and cause a short circuit. We have weatherproofed the RGB Controller unit to withstand small amounts of water. We recommended that you place the RGB Controller unit far away from heavy water areas such as the windshield wiper/roof drain areas. Next to the battery on the passengers side is perfect.

PROCESS

STEP 1. Open the hood and remove the double stage plastic pop clips that run along the top edge of the grill and holds the grill together. With your nylon panel removal tool or flathead screwdriver. Place the head of the tool under the pop clip head and gentle pry up a little. Use your fingers to take out the top section of the pop clip. Gentle pry up the grill plastic with your hands to loosen the lower section of the pop clip. Then work your way down the line to pop out all 6 pop clips.
