Geography Arild Holt-Jensen, 2009-09-24 Now in a fourth edition this standard student reference has been totally revised and updated. It remains the definitive introduction to the history, philosophy and methodology of human geography, now including a detailed explanation of key ideas in human geography's post-modernist and post-structuralist turns. The book is organized into six sections: What is Geography: an introduction to the discipline and a discussion of its organization and basic research approaches informed by the question: what difference does it make to think geographically? Foundations of Geography: an examination of geography from Antiquity to the 1950s with a special focus on human-environment relation. Geography 1950-1980: a critical review of the development of geography as a spatial science. Paradigms and Revolutions: an analysis of paradigm shifts in geography introducing students to key debates in the philosophy of science. Positivism and its Critics: a detailed discussion of positivism, critical theory, humanistic geography, behavioural geography and structuralism. New Trends and Ideas: developing critical responses to structuration theory, realism, post-structuralism, post-modernism, feminism and actor-network theory. This text explores complex ideas in an intelligible and accessible style. Illustrated throughout with research examples and explanations in text boxes, questions for discussion at the end of each chapter and a concept glossary, this is the essential student companion to the discipline.

**Project Earth Science** Geoff Holt, Nancy W. West, 2011 Project Earth Science Astronomy Revised 2nd Edition involves students in activities that focus on Earth's position in our solar system. How do we measure astronomical distances? How can we look back in time as we gaze across vast distances in space? How would our planet be different without its particular atmosphere and distance to our star? What are the geometries among Earth, the Moon and the Sun that yield lunar phases and seasons? Students explore these concepts and others in 11 teacher-tested activities.
