EBOOK: Caring for People with Chronic Conditions: A Health System Perspective Ellen Nolte, Martin McKee, 2008-09-16 Overall the book walks a delicate balance between evidence and advocacy regarding the care of people with chronic conditions Nolte and McKee conclude the volume with the following A first step is to recognize that something must be done A second which we hope will be facilitated by the evidence provided in this book is to realize that something actually can be done and that they can do it p 240 The overarching desire to match the need for evidence with the reality that advocates including policy makers need a reasoned voice makes the book well suited to health policy deliberations

International Journal of Integrated Care The complex nature of many chronic diseases which affect people many different ways requires a multifaceted response that will meet the needs of the individual patient Yet while everyone agrees that the traditional relationship between an individual patient and a single doctor is inappropriate there is much less agreement about what should replace it Many countries are now experimenting with new approaches to delivering care in ways that do meet the complex needs of people with chronic disorders redesigning delivery systems to coordinate activities across the continuum of care Yet while integration and coordination have an intuitive appeal policy makers have had little to help them decide how to move forward The book systematically examines some of the key issues involved in the care of those with chronic diseases It synthesises the evidence on what we know works or does not in different circumstances From an international perspective it addresses the prerequisites for effective policies and management of chronic disease Taking a whole systems approach the book Describes the burden of chronic disease in Europe Explores the economic case for investing in chronic disease management Examines key challenges posed by the growing complexity in healthcare including prevention the role of self management the healthcare workforce and decision support Examines systems for financing chronic care Analyses the prerequisites for effective policies for chronic care Caring for People with Chronic Conditions is key reading for health policy makers and health care professionals as well as postgraduate students studying health policy health services research health economics public policy and management Contributors Reinhard Busse Elisabeth Chan Anna Dixon Carl Ardy Dubois Isabelle Durand Zaleski Daragh K Fahey Nicholas Glasgow Monique Hejmans Izzat Jiwani Martyn Jones Cile Knai Nicholas Mays Martin McKee Ellen Nolte Thomas E Novotny Joceline Pomerleau Mieke Rijken Dhigna Rubiano Debbie Singh Marc Suhrcke

**The Bill Gates Problem** Tim Schwab, 2023-11-14 New York Times Editors Choice A powerful investigation of Bill Gates and the Gates Foundation showing how he uses philanthropy to exercise enormous political power without accountability Through his vaunted philanthropy Bill Gates transformed himself from a tech villain into one of the most admired people on the planet Even as divorce proceedings and allegations of misconduct have recently tarnished his public image the beneficence of the Gates Foundation celebrated for spending billions to save lives around the globe is taken as a given But as Tim Schwab shows in this fearless investigation Gates is still exactly who he was at Microsoft a bully and monopolist convinced of his own righteousness and intent on

imposing his ideas his solutions and his leadership on everyone else At the core he is not a selfless philanthropist but a power broker a clever engineer who has innovated a way to turn extreme wealth into immense political influence and who has made us believe we should applaud his acquisition of power not challenge it Piercing the blinding halo that has for too long shielded the world s most powerful and most secretive charitable organization from public scrutiny The Bill Gates Problem shows how Gates s billions have purchased a stunning level of control over public policy private markets scientific research and the news media Whether he is pushing new educational standards in America health reforms in India global vaccine policy during the pandemic or Western industrialized agriculture throughout Africa Gates s heady social experimentation has shown itself to be not only undemocratic but also ineffective In many places Bill Gates is hurting the very people he intends to help No less than dark money campaign contributions or big business political lobbying Bill Gates s philanthropic empire needs to be seen as a problem of money in politics It is a dangerous model of unconstrained power that threatens democracy and demands our attention
