Holt Literature Everyday Use Multiple Choice:

Sold on Language Julie Sedivy, Greg Carlson, 2011-05-03 As citizens of capitalist free market societies we tend to celebrate choice and competition. However in the 21st century as we have gained more and more choices we have also become greater targets for persuasive messages from advertisers who want to make those choices for us. In *Sold on Language* noted language scientists Julie Sedivy and Greg Carlson examine how rampant competition shapes the ways in which commercial and political advertisers speak to us. In an environment saturated with information advertising messages attempt to compress as much persuasive power into as small a linguistic space as possible. These messages the authors reveal might take the form of a brand name whose sound evokes a certain impression, a turn of phrase that gently applies peer pressure or a subtle accent that zeroes in on a target audience. As more and more techniques of persuasion are aimed squarely at the corner of our mind which automatically takes in information without conscious thought or deliberation, does endless choice actually mean the end of true choice? *Sold on Language* offers thought provoking insights into the choices we make as consumers and citizens and the choices that are increasingly being made for us. Phenomenological Inquiry in Psychology Ron Valle, 2013-11-11 This fine new book, the third in a series, brings psychologists up to date on the advances of phenomenological research methods in illuminating the nature of human awareness and experiences. In the more congenial and welcoming intellectual climate of the 1990s, phenomenological methods have moved to the forefront of discourse on research methods that support and advocate an expanding view of science. In Valle and King 1978, phenomenological methods were presented as alternatives to behavioral methods. In Valle and Halling 1989, phenomenological methods were advanced to perspectives in psychology. This new volume is even less cautious, indeed bolder, in relation to conventional methods and epistemologies. By now people knowledgeable about psychology and most psychologists have digested the criticisms directed against methods that operationalize, quantify, and often minimize human behavior. In bringing us up to date on the growing power of phenomenological methods, this volume brings welcome coherence and integrity to an increasingly harried science attempting to re-enchant itself with meaning and depth, an endeavor artfully exemplified by phenomenological inquiries of the last several decades.

Burrows Brothers Company, Cleveland, 1901 *Born to Choose* John H Falk, 2017-09-05 *Born to Choose* is John H Falk's compelling account of why and how we make the endless set of choices we do every second of every day of our lives. Synthesizing research from across the biological and social sciences, Falk argues that human choice making is an evolutionarily ancient and complex process. He suggests that all our choices are influenced by very basic and early evolving needs and that ultimately each choice is designed to support survival in the guise of perceived well-being. This engaging book breaks new intellectual ground and enhances our understanding not just of human choice making but human behavior overall.

Reimagining Communication: Mediation Michael Filimowicz, Veronika Tzankova, 2020-05-04 *Reimagining Communication* explores information and media technologies across a variety of contemporary platforms, uses, content variations, audiences, and professional roles. A diverse body of contributions in this unique interdisciplinary resource offers perspectives on digital games, social media, photography, and more. The volume is organized to reflect a pedagogical approach of carefully laddered and sequenced topics which supports experiential, project-based learning in addition to a course's traditional writing requirements. As the field of Communication Studies has been continuously growing and reaching new horizons, this volume synthesizes the complex relationship of communication to media technologies and its forms in a uniquely accessible and engaging way. This is an essential introductory text for advanced undergraduate and graduate students and scholars of communication, broadcast media, and interactive technologies with an interdisciplinary focus and an emphasis on the integration of new technologies. **The Reader, a review of literature, science, and art**, 1866-07
