Hurricane Manuel In Sinaloa Mexico:

The Holocene and Anthropocene Environmental History of Mexico Nuria Torrescano- Valle, Gerald A. Islebe, Priyadarsi D. Roy, 2019-12-02 This book provides essential information on Mexico's Holocene and Anthropocene climate and vegetation history. Considering the geography of Mexico which is home to a variety of climatic and environmental conditions from desert and tropical to high mountain climates this book focuses on its postglacial paleoecology and paleoclimatology. Further it analyses human intervention since the middle Holocene as a major agent of environmental change. Offering a valuable tool for understanding past climate change and its relationship with present climate change the book is a must read for botanists, ecologists, palaeontologists and graduate students in related fields. *Crime Wars and Narco Terrorism in the Americas* Robert J. Bunker, 2014-07-16 This work marks the 3rd Small Wars Journal El Centro anthology. Its analyses crafted by over thirty contributing authors forms a compilation of the violence and corruption in Mexico plaguing the first year of Enrique Peña Nieto's presidency. Instances of spillover violence in the United States and the gang and cartel crime wars in other Latin American countries are also chronicled. Spanish language article appendices are additionally incorporated in this important anthology. Dave Dilegge SWJ Editor in Chief. *Latin America and the Caribbean* Brian W. Blouet, Olwyn M. Blouet, 2015-01-20 Updated and revised with many new detailed maps and photographs. Latin America and the Caribbean A Systematic and Regional Survey 7th Edition enables geographers to explore the changes and major issues facing this dynamic region today. The historical material has been streamlined in order to focus on contemporary issues. A new chapter was written to focus on Brazil and the Amazonia region. Key environmental issues are highlighted in new boxes throughout the chapters. **Of Rainfalls and Disasters** Juan Manuel Rodríguez Esteves, Disasters associated with natural phenomena such as earth quakes, floods, droughts etcetera are intensifying damages that translate into deaths, the loss of infrastructure and the interruption of economic activities. The accelerated growth of cities frequently incorporates new areas that are susceptible to certain hazards leaving society increasingly exposed due to a mismanagement of land. Since the 1990s the social sciences have developed the approach of vulnerability which considers the conditions of weakness of a society to cope with hazards. We now know that risk is socially constructed and so disasters are not only a result of the intensity of the geophysical phenomena that unleash them but also of the contexts of vulnerability present when a phenomenon takes place. The aim of this work is to show how the risk of flood disasters is constructed in Tijuana, Baja California with four main elements as our starting point. An examination of floods since the late 19th century, the voice of the actors present for flooding events, a theoretical model to understand the relationship between the hazard and the magnitude of the risk and recommendations for disaster risk management at a local level. **Political Handbook of the World 2018-2019** Tom Lansford, 2019-03-19 The Political Handbook of the World provides timely, thorough and accurate political information with more in-depth coverage of current political controversies than any other reference guide. Awaiting Their Feast Lori A. Flores,2025-01-10 Though Latinx foodways are eagerly embraced and consumed by people across the United States the nation exhibits a much more fraught relationship with Latinx people including the largely underpaid and migrant workers who harvest process cook and sell this desirable food Lori A Flores traces how our dual appetite for Latinx food and Latinx food labor has evolved from the World War II era to the COVID 19 pandemic using the US Northeast as an unexpected microcosm of this national history Spanning the experiences of food workers with roots in Mexico Puerto Rico Cuba the Dominican Republic Haiti and Central America Flores s narrative travels from New Jersey to Maine and examines different links in the food chain from farming to restaurants to seafood processing to the deliverista rights movement What unites this eclectic material is Flores s contention that as our appetite for Latinx food has grown exponentially the visibility of Latinx food workers has demonstrably decreased This precariat is anything but passive however and has historically fought and is still fighting against low wages and exploitation medical neglect criminalization and deeply ironic food insecurity
