## **Husserl's Ideen 66 Contributions To Phenomenology:**

Husserl's Ideen Lester Embree, Thomas Nenon, 2012-11-05 This collection of more than two dozen essays by philosophy scholars of international repute traces the profound impact exerted by Husserl's Meisterwerk known in its shortened title as *Ideen* whose first book was released in 1913. Published to coincide with the centenary of its original appearance and fifty years after the second book went to print in 1952 the contributors offer a comprehensive array of perspectives on the ways in which Husserl's concept of phenomenology influenced leading figures and movements of the last century including among others Ortega y Gasset, Edith Stein, Martin Heidegger, Aron Gurwitsch, Ludwig Landgrebe, Dorion Cairns, Simone de Beauvoir, Jean Paul Sartre, Maurice Merleau Ponty, Jacques Derrida and Giles Deleuze. In addition to its documentation and analysis of the historical reception of these works this volume also illustrates the ongoing relevance of the *Ideen* offering scholarly discussion of the issues raised by his ideas as well as by the figures who took part in critical phenomenological dialogue with them. Among the topics discussed are autism, empathy, the nature of the emotions, the method and practice of phenomenology, the foundations of ethics, naturalism, intentionality and human rights to name but a few. Taken together these specially commissioned original essays offer an unrivaled overview of the reception of Husserl's *Ideen* and the expanding phenomenological enterprise it initiated. They show that the critical discussion of issues by phenomenologists continues to be relevant for the 21st century.

**Eco-Phenomenology** Charles S. Brown, Ted Toadvine, 2012-02-01 This groundbreaking collection explores the intersection of phenomenology with environmental philosophy. It examines the relevance of Husserl, Heidegger, Merleau Ponty and Levinas for thinking through the philosophical dilemmas raised by environmental issues and then proposes new phenomenological approaches to the natural world. The contributors demonstrate phenomenology's need to engage in an ecological self-evaluation and to root out anthropomorphic assumptions embedded in its own methodology. Calling for a reexamination of beliefs central to the Western philosophical tradition this book shifts previously marginalized environmental concerns to the forefront and blazes a trail for a new collaboration between phenomenologists and ecologically minded theorists.

*Teaching Women Philosophers* Ruth Edith Hagengruber, 2024-08-30 This book expands the known canon by presenting arguments and concepts from women philosophers from all periods of the history of philosophy from antiquity to the present day. The collaborative collection is an undertaking that emerged from intensive discussions on how to expand the philosophical canon which formed the conclusion of the Libori Summer School 2019. This Libori Summer School the third in a row was held to enhance the study of texts written by women philosophers from Antiquity up to now and intended to give opportunity to young scholars to connect and to build networks. Presenting such a collection is even more urgent today because a diversification of the canon has long been called for. Nevertheless to date there is little explicit material available for this purpose. To make this book suitable for both academics and students it is structured in such a way that readers can use excerpts and individual chapters from it that suit their needs be it in moral philosophy, politics or

phenomenology etc Containing chapters on women such as Suor Juana Emilie Du Ch telet and Nisia Floresta and supplemented by contextualization namely by some brief biographical information and by the systematic integration of her argument into the debates of the respective periods this book is an important resource highlighting the achievements and value of women in philosophy and calling for a further diversification of the canon

**The Phenomenological Critique of Mathematisation and the Question of Responsibility** Lubica Učník, Ivan Chvatík, Anita Williams, 2014-11-19 This edited collection discusses phenomenological critiques of formalism and their relevance to the problem of responsibility and the life world The book deals with themes of formalization of knowledge in connection to the life world the natural world the history of science and our responsibility for both our epistemic claims and the world in which we live Readers will discover critiques of formalization the life world and responsibility and a collation and comparison of Pato ka s and Husserl s work on these themes Considerable literature on Husserl is presented here and the two themes of epistemic responsibility and the life world are discussed together This work specifically emphasizes the interrelatedness of these existential aspects of his work self responsibility and the crisis as not only epistemological but also related to human life This volume also introduces Jan Pato ka to English speaking readers as a phenomenologist in his own right Pato ka shows us in particular the significance of the modern abyss between our thinking and the world Readers will discover that this abyss is of concern for our everyday experience because it leads to a rupture in our understanding of the world between the world of our living and its scientific

construct We see that Pato ka continually emphasized the relevance of Husserl s work to existential questions relating to human responsibility and the life world which he admits is left largely implicit in Husserl s work This edited collection will spark discussion on the question of responsibility against the backdrop of formalized knowledge which is increasingly inaccessible to human understanding Despite the complexity of some of the analyzed ideas this book discusses these themes in a clear and readable way This work is scholarly exact in its discussion and authoritative in its reading but at the same time accessible to anyone motivated to understand these debates

**Husserl's Constitutive Phenomenology** Bob Sandmeyer, 2009-01-11 If Edmund Husserl s true philosophy lay in his unpublished research manuscripts as he argues then it is in these rather than the introductions and fragmentary studies he published during his lifetime that we may possibly find a systematic of his philosophy This work constitutes a study of the full range of Husserl s writings with the special task of uncovering there the systematic presentation or presentations of the transcendental phenomenological problematic Sandmeyer s study contains an overview of Husserl s total set of writings a translation of Husserl correspondence with Georg Misch a translation of a draft outline of the system of phenomenological philosophy produced by Husserl in collaboration with his assistant Eugen Fink and it also closely traces the influence of Wilhelm Dilthey on Husserl s philosophy

resource for therapists working with Christian patients      *Skillful Coping* Hubert L. Dreyfus, 2014-08-07 For fifty years Hubert Dreyfus has addressed an astonishing range of issues in the fields of phenomenology existentialism cognitive science and the philosophical study of mind Dreyfus has inspired a whole generation of philosophers as he has creatively drawn on and clearly articulated the seminal works of thinkers like Kierkegaard Husserl Heidegger Merleau Ponty and Foucault This volume presents a selection of Dreyfus s most influential essays on mind and action The book begins with a model of skillful engaged human action which informs much of Dreyfus s philosophy and was developed in collaboration with Stuart Dreyfus The volume then presents articles developing a critique of the representational model of the mind in analytical philosophy of mind and mainstream cognitive science Dreyfus argues that representational models of mind offer an impoverished and distorting account of human engagement with the world The chapters show this by addressing issues in philosophy of mind and the cognitive sciences through the skill model      *Commentary on Husserl's "Ideas I"* Andrea Staiti, 2015-09-14 Husserl s *Ideas for a Pure Phenomenology and Phenomenological Philosophy* 1913 is one of the key texts of twentieth century philosophy It is the first of Husserl s published works to present his distinctive version of transcendental philosophy and to put forward the ambitious claim that phenomenology is the fundamental science of philosophy In *Ideas* Husserl introduces for the first time the conceptual arsenal of his mature phenomenology the principle of all principles the phenomenological epoch and reduction pure consciousness and the noema All these difficult notions have been influential and controversial in subsequent philosophy both analytic and Continental In this commentary thirteen leading scholars of Husserlian phenomenology set out to clarify and defend Husserl s views connecting them to the vast corpus of his published and unpublished writings and discussing the main available interpretations in the existing scholarship The result is a detailed and comprehensive account of the most original form of transcendental philosophy since Kant s *Critique of Pure Reason*      [Soul and Body in Husserlian Phenomenology](#) Anna-Teresa Tymieniecka, 2012-12-06      [Critical Philosophy of Race](#) Robert Bernasconi, 2023 The fifteen essays by distinguished philosopher of race Robert Bernasconi that are collected here demonstrate why the critical philosophy of race needs to take a historical turn Genealogies of the concepts of both race and racism clarify why some of the dominant strategies for combatting racism tend to be ineffective For example the Boasian UNESCO strategy that highlights biology s rejection of race neglects cultural racism Drawing on the work of Frantz Fanon the late Sartre and Michel Foucault Robert Bernasconi argues for a holistic approach that integrates the concrete experience of racism faced by individuals into the study of institutional structural and systemic racism His philosophical studies of such Black philosophers as Ottobah Cugoana Ant nor Firmin and W E B Du Bois contribute to challenging the dominant philosophical canon This volume will be an essential resource for scholars and students interested in this resurgent topic

**Advancing Phenomenology** Thomas Nenon, Philip Blosser, 2010-09-08 Philip Blosser and Thomas Nenon The essays in the volume were assembled in honor of Lester Embree who celebrated his 70th birthday on January 9 2008 A preview of this

volume was presented to Professor Embree at a reception sponsored by the Center for Advanced Research in Phenomenology that was held in his honor at the 2008 meeting of the Husserl Circle at Marquette University in Milwaukee Wisconsin. The title *Advancing Phenomenology* is purposely ambiguous. On the one hand these essays document the progress that phenomenology as an ongoing and vibrant movement has made in the period of over a century since its inception. They illustrate the advance of phenomenology both in terms of the range of topics represented in this volume and in terms of the disciplinary and geographical diversity of the scholars who have contributed to it. The topics range from scholarly appropriations of past achievements in phenomenology to concrete phenomenological investigations into ethics, gender, and environmental philosophy as well as phenomenological reflections on the foundations of disciplines outside philosophy such as psychology, history, the social sciences, and archeology. The contributors come both from philosophy departments and from a number of disciplines outside of philosophy such as sociology, psychology, and archeology, and they come from all around the world from North America, from Western and Eastern Europe, from Latin America, and from several different countries in Asia.

*Edmund Husserl: The web of meaning : language, noema, and subjectivity and intersubjectivity* Rudolf Bernet, Donn Welton, Gina Zavota, 2005. This collection makes available in one place the very best essays on the founding father of phenomenology, reprinting key writings on Husserl's thought from the past seventy years. It draws together a range of writings, many otherwise inaccessible, that have been recognized as seminal contributions not only to an understanding of this great philosopher but also to the development of his phenomenology. The four volumes are arranged as follows: Volume I: Classic essays from Husserl's assistants, students, and earlier interlocutors, including a selection of papers from such figures as Heidegger, Merleau-Ponty, Sartre, Ricoeur, and Levinas. Volume II: Classic commentaries on Husserl's published works. Covering the Logical Investigations, Ideas I, Phenomenology of Internal Time, Consciousness and Formal and Transcendental Logic. Volumes III and IV: Papers concentrating on particular aspects of Husserl's theory, including Husserl's account of mathematics and logic, his theory of science, the nature of phenomenological reduction, his account of perception and language, the theory of space and time, his phenomenology of imagination and empathy, the concept of the life-world, and his epistemology.

*Eros and Eris* P. van Tongeren, Paul Sars, Chris Bremmers, Koen Boey, 2013-04-17. The articles in this book display the originality and creativity of Eros and Eris and their important role in the history of our culture, particularly in the history of philosophy and its role in today's systematic philosophy. Although these contributions to a hermeneutical phenomenology in this compilation are organized in a linear chronological order, treating Homer, Hesiod, Plato, Aristotle, Augustine, Bonaventure, Thomas Aquinas, Cusanus, Kant, Hegel, Schelling, Nietzsche, Husserl, Heidegger, and Levinas, they all carry out their own hermeneutical movement in the history of philosophy on the basis of a commitment with our life here and now and a thematic professional interest. Among the contributors are R. Bernasconi, J. Colette, J.-F. Courtine, L. Dupré, K. D. Singh, J. Greisch, J. Kockelmans, P.-J. Labarrière, and G. Jarczyk, E. Levinas, A. Lingis, J.-L. Marion, O. Pöggeler, W. Richardson, P. Ricoeur, J. Sallis.

**Being a Lived Body** Tonino Griffero, 2023-12-29 This book begins with the distinction between the so called lived body or felt body Leib and the physical body Körper tracing the conceptual history of this distinction through key figures in philosophical and social thoughts and articulating a theory of the lived body that draws on the New Phenomenology developed by Hermann Schmitz An explanation of our being in the world in terms of a felt bodily communication with all

perceived forms and their affective bodily resonance in us *Being a Lived Body* integrates and critically assesses the leading theories of embodiment while presenting a new approach to the body It will therefore appeal to scholars of philosophy social theory and anthropology with interests in phenomenology and embodiment
