*Sublime Historical Experience* F. R. Ankersmit, 2005 Why are we interested in history at all Why do we feel the need to distinguish between past and present This book investigates how the notion of sublime historical experience complicates and challenges existing conceptions of language truth and knowledge **William Wegman** Joan Simon, William

Wegman, Brooklyn Museum, 2006-01-01 An examination of William Wegman and how he transposes images of daily life to reflect both beauty and absurdity Hegel's Phenomenology of Spirit Ludwig Siep, 2014-01-16 Hegel only published five books in his lifetime and among them the Phenomenology of Spirit emerges as the most important but also perhaps the most difficult and complex In this book Ludwig Siep follows the path from Hegel's early writings on religion love and spirit to the milestones of his Jena period He shows how the themes of the Phenomenology first appeared in an earlier work The Difference between Fichte's and Schelling's Systems of Philosophy and closely examines the direction which Hegel's thought took as he attempted to think through the possibility of a complete system of philosophy The themes encompassed by the Phenomenology anti dualistic epistemology autonomy historicity the sociality of reason are thoroughly discussed in Siep's subtle and elegantly argued assessment which appears here in English for the first time It will be of great interest to all readers studying Hegel's thought **Burning Darkness** Joan Ramon Resina, 2008-07-16 From the origins of the New

Spanish Cinema in the 1950s to the end of the last century Burning Darkness features essays on a selection of essential films by Spain's most important directors including Pedro Almodóvar Luis Buñuel Víctor Erice Ventura Pons and others Contributors focus on current theoretical debates and issues of representation politics cultural identity and aesthetics Rather than historically surveying Spanish films the book encourages a deep reading of these essential works and the ways they cast light on specific aspects of Spanish society and its recent history Accessibly written it will appeal not only to students and scholars but also to anyone interested in Spanish cinema **Film - An International Bibliography** Malte

*The New Werner Twentieth Century Edition of the Encyclopaedia Britannica*, 1906 **Religion and Human Rights** Wilhelm Gräb, Lars Charbonnier, 2015-05-19 Current processes of globalization are challenging Human Rights and the attempts to institutionalize them in many ways The question of the connection between religion and human rights is a crucial point here The genealogy of the Human Rights is still a point of controversies in the academic discussion Nevertheless there is consensus that the Christian tradition especially the doctrine that each human being is an image of God played an important role within the emergence of the codification of the Human Rights in the period of enlightenment It is also obvious that the struggle against the politics of apartheid in South Africa was strongly supported by initiatives of churchy and other religious groups referring to the Human Rights Christian churches and other religious groups do still play an important role in the post apartheid South Africa They have a public voice concerning all the challenges with which the multiethnic and economically still deeply divided South African society is faced with The reflections on these questions in the collected lectures and essays of this volume derive from an academic discourse between German and South African scholars that took place within the German South African Year of Science 2012 13 **Placing Modern Greece** Constanze

Guthenke, 2008-02-07 **Placing Modern Greece** is about literary representations of Greece in the period of Romanticism encompassing the time in the 1820s when it became a territorial and political reality as a nation state Constanze Guthenke claims that the imagining of and attitude towards Greece was shaped by a fascination with the material and by the highly conceptualized tension between the ideal on the one hand and the material on the other Her study focuses on nature and landscape imagery as vehicles of representation on their specific inner workings and on their dynamic which conditions how and whether Greece as a modern entity in the making can be represented at all Offering readings from German and contemporaneous Greek authors Guthenke supplies a commentary on the translation and crossings of representational models and their limits **The Erotics of War in German Romanticism** Patricia Anne Simpson, 2006 In *The Erotics of War in German Romanticism* Patricia Anne Simpson explores the ways early nineteenth century German philosophers poets and artists represent war and erotic desire The author argues that gender is connected to a larger debate about the

construction of the self in relation to a community at a time that this definition is under revision She analyzes the culture of war as it shapes the bonds of fraternal familial and eventually national identity Simpson defines the erotics of war as discursive attempts to assert the priority of ethical identity and citizenship over individualized desire The seemingly ancillary problem of female desire emerges not as a marginal issue but as the focal point of a debate about identity Law, Text, Terror Peter Goodrich, Lior Barshack, Anton Schutz, 2013-10-18 The essays collected here under the governing signs Law Text Terror have their origins in a singular and topical desire Their motive is most immediately that of acknowledging the massive and eccentric contribution of the philologist psychoanalyst and Romanist jurist Pierre Legendre to the study of legal institutions and juridical practices He has unceasingly asked the question why law and in endeavouring to answer that question in the course of over twenty five books published during the last forty years he has traversed a unique and uniquely idiosyncratic body of disciplines and knowledges relevant to the symbolic forms and institutional functions of the Western legal order These essays reflect that singularity of drive as well as that diversity of scholarly interests by taking up playing with varying and developing the themes of text and terror law and territory that Legendre either introduced or made peculiarly his own *Song* Carol Kimball, 2006-12-01 Carol Kimball's comprehensive survey of art song literature has been the principal one volume American source on the topic Now back in print after an absence of several years this newly revised edition includes biographies and discussions of the work of Franz Schubert Graham Johnson, 2014-12-16 This three volume boxed set is the definitive work on Franz Schubert's vocal music with piano A richly illustrated encyclopedia these substantial volumes contain more than seven hundred song commentaries with parallel text and translations by Richard Wigmore detailed annotations on the songs poetic sources and biographies of one hundred and twenty poets as well as general articles on accompaniment tonality transcriptions singers and more Written by Graham Johnson celebrated accompanist author and the first pianist ever to record all of Schubert's songs and part songs this sumptuous work is a must for performers scholars and all lovers of Schubert lieder **Hans Holbein the Younger** Erika Michael, 1997 Addressing the critical reception of painter Hans Holbein the Younger 1497-98-1543 this volume consists of two parts The first section comprises a series of short essays reflecting responses to Holbein throughout history which forged his critical and popular reputation This section also includes overviews of the most important monographs and exhibitions as well as a selection of research published since 1980 The second much larger part is an annotated bibliography containing some 2 500 entries on a range of subjects including books essays in scholarly journals and articles published in the popular media Annotation copyrighted by Book News Inc Portland OR A History of German Literature John George Robertson, 1902 **The Encyclopædia Britannica**, 1893 Edward Elgar and His World Byron Adams, 2011-11-14 Edward Elgar 1857-1934 is undoubtedly one of the most fascinating important and influential figures in the history of British music He rose from humble beginnings and achieved fame with music that to this day is beloved by audiences in England and his work has secured an
