Practical Assignment – Hypothesis testing

- (10 points) Using the data that you collected for the assignment on describing data, determine if there is a significant difference in the distance between the tips of the horns between the barchans from Namibia in Peru. Use the student's t-test (assuming unequal variance) and an $\alpha = 0.05$. Report the following values: p-value (two tailed), test statistic, and critical test statistic. Is there a significant difference between the barchans from the two regions?

Solution:

- p-value: 0.0003
- test-statistic: 4.42
- critical test statistic: 2.06
- Conclusion: Significant difference.

- (40 points) Load the image "magaliesberg.1.png" into GeoGebra. Set the bottom left coordinate to (0,0), the bottom right coordinate to (202.27,0), and work in mm. Place these values into a table and perform the student's t-test (use an $\alpha = 0.05$ and assume unequal variance). Report the following values: p-value (two tailed), test statistic, and critical test statistic. Additionally, report the following values: p-value (two tailed), test statistic, and critical test statistic. ,1947 **Qualitative Methods** Dr. Salma Seth, Dr. N.K. Chadha, Dr. Harpreet Bhatia, 2022-05-16 This book aims to provide researchers who are new or relatively new to qualitative research with the methodological tools and conceptual maps they need to navigate their way through the process. It describes the uncertainties surrounding qualitative research and the many dilemmas faced by researchers. It illustrates these by drawing on the experiences of researchers with varying degrees of expertise in qualitative research. It also provides readers with the necessary background knowledge and raises their awareness of the questions they will need to address to help them make informed decisions about how to deal with these uncertainties and dilemmas. The contents of the book are organized in a way that reflects the three main objectives that the authors had in mind. The first objective was to provide readers with the necessary background knowledge and an awareness of the questions they will need to address in order to make informed decisions about whether to conduct qualitative research and if they decide to follow a qualitative path which particular qualitative approaches would be suited to their research goals. The second objective was to equip readers with the basic tools to carry out their analysis by providing detailed contextualized coverage of the practicalities of the qualitative methods approaches. In addition, the book includes accounts of an actual analysis of a specific data set in a step by step manner using the approaches. The third objective was to provide the reader with guidance as to how to write up qualitative research in general and the ethical considerations of qualitative inquiry in the concluding chapter.
