Delta, 2009 **Internet Law** Chris Reed, 2004-10-07 The common fallacy regarding cyberspace is that the Internet is a new jurisdiction in which none of the existing rules and regulations apply However all the actors involved in an Internet transaction live in one or more existing jurisdictions so rather than being unregulated the Internet is arguably highly regulated Worse much of this law and regulation is contradictory and difficult or impossible to comply with This book takes a global view of the fundamental legal issues raised by the advent of the Internet as an international communications mechanism Legal and other materials are integrated to support the discussion of how technological economic and political factors are shaping the law governing the Internet Global trends in legal issues are addressed and the effectiveness of potential mechanisms for legal change that are applicable to Internet law are also examined Of interest to students and practitioners in computer and electronic commerce law Internet Law Jonathan D.
