Love And Friendship:

Love, Friendship, and the Self Bennett W. Helm, 2010-01-07 Recent Western thought has consistently emphasized the individualistic strand in our understanding of persons at the expense of the social strand. Thus it is generally thought that persons are self-determining and autonomous where these are understood to be capacities we exercise most fully on our own apart from others whose influence on us tends to undermine that autonomy. Love, Friendship and the Self argues that we must reject a strongly individualistic conception of persons if we are to make sense of significant interpersonal relationships and the importance they can have in our lives. It presents a new account of love as intimate identification and of friendship as a kind of plural agency in each case grounding and analyzing these notions in terms of interpersonal emotions. At the center of this account is an analysis of how our emotional connectedness with others is essential to our very capacities for autonomy and self-determination: we are rational and autonomous only because of and through our inherently social nature. By focusing on the role that relationships of love and friendship have both in the initial formation of our selves and in the on-going development and maturation of adult persons, Helm significantly alters our understanding of persons and the kind of psychology we persons have as moral and social beings.

relationship with Pompey Caesar Atticus Quintus Terentia and Tullia encompassed several aspects of Aristotle's account of love and friendship but was nonetheless ultimately based on expediency in accord with Epicurus' conception of friendship. While Cicero's statements in his public speeches and his letters to men with an active public life have been scrutinised for his lack of candour or for his tendency to exaggerate his achievements, the claims found in his letters to Atticus and to his family have not been treated with equal caution as they tend to be taken at face value. The book highlights the large number of discrepancies in his remarks and argues that despite his anti-Epicurean statements, personal benefit played a vital role in all of his relationships.
