

Density Laboratory

Answer Key

Vocabulary: buoyancy, density, graduated cylinder, mass, matter, scale, volume

Prior Knowledge Questions (Do these BEFORE using the Gizmo.)

[Note: The purpose of these questions is to activate prior knowledge and get students thinking. Students are not expected to know the answers to the Prior Knowledge Questions.]

1. Of the objects below, circle the ones you think would float in water. *Predictions will vary.*

Correct answers are shown:

Rock

Crane ship

Quarter

Saturn

Beach ball

2. Why do some objects float, while others sink?

Answers will vary. [An object floats when the weight of the liquid it displaces is equal to the weight of the object. Objects sink when they are heavier than the equivalent volume of liquid. In other words, objects sink when they are denser than the liquid.]

Gizmo Warm-up

The *Density Laboratory Gizmo™* allows you to measure a variety of objects, then drop them in water (or other liquid) to see if they sink or float.

1. An object's **mass** is the amount of **matter** it contains. The mass of an object can be measured with a calibrated **scale** like the one shown in the Gizmo. Drag the first object onto the **Scale**. (This is object 1.)

What is the mass of object 1? *19.5 grams (19.5 g)*

2. An object's **volume** is the amount of space it takes up. The volume of an irregular object can be measured by how much water it displaces in a **graduated cylinder**. Place object 1 into the **Graduated cylinder**.

What is the volume of object 1? *14.0 cm³ (equivalent to 14.0 mL)*

Note: While milliliters (mL) are used to measure liquid volumes, the equivalent unit cubic centimeters (cm³) are used for solids. Therefore, write the volume of object 1 in cm³.

3. Drag object 1 into the **Beaker of liquid**. Does it sink or float? *It sinks.*

Freakonomics and Malcolm Gladwell's Outliers. It teaches through a powerful narrative packed with unforgettable stories. Murtaza Haider offers informative jargon-free coverage of basic theory and technique backed with plenty of vivid examples and hands-on practice opportunities. Everything's software and platform agnostic so you can learn data science whether you work with R, Stata, SPSS, or SAS. Best of all, Haider teaches a crucial skillset most data science books ignore: how to tell powerful stories using graphics and tables. Every chapter is built around real research challenges so you'll always know why you're doing what you're doing. You'll master data science by answering fascinating questions such as: Are religious individuals more or less likely to have extramarital affairs? Do attractive professors get better teaching evaluations? Does the higher price of cigarettes deter smoking? What determines housing prices: more lot size or the number of bedrooms? How do teenagers and older people differ in the way they use social media? Who is more likely to use online dating services? Why do some purchase iPhones and others BlackBerry devices? Does the presence of children influence a family's spending on alcohol? For each problem, you'll walk through defining your question and the answers you'll need, exploring how others have approached similar challenges, selecting your data and methods, generating your statistics, organizing your report, and telling your story. Throughout, the focus is squarely on what matters most: transforming data into insights that are clear, accurate, and can be acted upon.

Report, 1964 Dynamic Supply Chains John Gattorna, 2015-03-31

Dynamic Supply Chains is a masterpiece in the field of supply chain management. Dr. Rakesh Singh, Chairman, Institute of Supply Chain Management, India. Dynamic supply chains are at the heart of your business. You need to get them right. Are your supply chains equipped to compete for a faster, more flexible future? Supply chains are not just part of your business; in many ways, they are your business. They are made up of living, active people, and to really get supply chains right, you need to capture the dynamism that people can bring to the flow of goods and services, both inside and outside your business. In this third edition of Dynamic Supply Chains, renowned international expert John Gattorna gives you a practical and effective new model for supply chains that will help you get closer to your customers and suppliers and set your business on a new path to growth. John's outside-in philosophy is based on Design Thinking principles, underpinned by business analytics, visualization, and the passion to get things done. This is indeed supply chains by design.

Energy Research Abstracts, 1992 **The Powers That Be** Scott L. Montgomery, 2010-07-15

Thirty years ago, our global energy landscape did not look remarkably different from what it does today. Three or four decades from now, it certainly will. Dwindling oil reserves will clash with skyrocketing demand as developing nations around the world lead their citizens into the modern energy economy, and all the while, the grave threat of catastrophic climate change looms ever larger. Energy worries are at an all-time high; just how will we power our future? With *The Powers That Be*, Scott L. Montgomery cuts through the hype, alarmism, and confusion to give us a straightforward, informed account of where we are now and a map of where we're going. Starting with the inescapable fact of our current dependence on fossil fuels, which supply 80% of all our energy needs today, Montgomery clearly and carefully lays out the

many alternative energy options available ranging from the familiar like water and solar to such nascent but promising sources as hydrogen and geothermal power What is crucial Montgomery explains is understanding that our future will depend not on some single wondrous breakthrough instead we should focus on developing a more diverse adaptable energy future one that draws on a variety of sources and is thus less vulnerable to disruption or failure An admirably evenhanded and always realistic guide Montgomery enables readers to understand the implications of energy funding research and politics at a global scale At the same time he doesn't neglect the ultimate connection between those decisions and the average citizen flipping a light switch or sliding behind the wheel of a car making The Powers That Be indispensable for our ever more energy conscious age
