*Humanistic Management, Organization and Aesthetics* Michał Szostak,2023-11-17 The book is the first worldwide publication of a complex theory of management aesthetics in humanistic management based on the aesthetics and arts approach allowing for a complete and systemic understanding of the management art and art management phenomena The methodology is based on the critical literature review and empirical research applying qualitative quantitative and autoethnographic approaches The main goal of this monograph is to create a holistic model that organises the issues of

management aesthetics and shows the interdependence of the components of this model. The role of this model should be to perform a central function for a complete and systemic understanding of the phenomenon of management aesthetics as well as to perform the function of a field based on which analysis of individual issues in the area of management aesthetics is conducted. The critical component of this holistic model is Maria Go aszewska's theory of the aesthetic situation. Two theses of the book are the following: 1. the theory of aesthetics and artistic practice have the potential to enrich the theory and practice of management with qualitative components through deep immersion in the world of values and 2. management theory and practice have the potential to enrich the theory of aesthetics and artistic practice with efficiency components.
