Financial Accounting and Management Control Fredrik Nilsson, Anna-Karin Stockenstr nd, 2015-02-20 This book is about financial accounting and management control and how these two information systems are related as well as how their objectives conflict At the most fundamental level the objective of financial accounting is to provide owners and funders with comparable information on a company's value creation The aim of management control on the other hand is to give the board senior executives and employees unique information for strategy formulation and implementation One often mentioned negative effect is the risk of financial accounting affecting management control design and use making it less relevant for decision making at the company level The book provides an analysis of the complex relationship between financial accounting and management control The analysis is based on theoretical reasoning as well as several examples of how financial accounting standards affect not only the annual report but also the control system An interesting and perhaps unexpected conclusion is

that management control seems to affect financial accounting almost as much as financial accounting affects management control These complex relationships which can influence the design and use of both financial accounting and management control are discussed in detail in this book *Managing Financial Resources* Mick Broadbent, John Cullen, 2012-05-04

Managing Financial Resources addresses the complicated issues of financial planning and control These include performance measures and cost analysis methods of improving profitability and techniques of financial monitoring and control Real examples and case studies are used throughout to illustrate points in a practical context All chapters have been updated and new material has been added to extend the original text in areas such as public sector management issues audit commission capital investment decisions stakeholder analysis for published reports and accounts performance measurement outsourcing new developments in the public sector and transfer pricing This book is based on the Management Charter Initiative s Occupational Standards for Management NVQs and SVQs at level 4 It is particularly suitable for managers on the Diploma in Management or part 1 of the Postgraduate Diploma especially those accredited by the Chartered Management Institute and Edexcel but this also a useful text for practicing managers and those individuals studying for a MBA
