properties of animal organisms Each species each individual in fact each cell type of a multicellular animal has its own
molecular characters This advanced text and reference book deals with the molecular structures of body substances and the
chemical processes of metabolism for the first time throughout the whole animal kingdom from the protozoans to the higher
vertebrates The biochemical variation is explained as adaptation to particular environmental conditions or as the result of
phylogenetic diversification The fascinating insights into the fundamental mechanisms and the time course of evolution that
have been gained by the analysis of molecular data are extensively described More than 4600 actual references give the
