The Ethos of Medicine in Postmodern America Arnold R. Eiser, 2013-12-24

Has postmodern American culture so altered the terrain of medical care that moral confusion and deflated morale multiply faster than both technological advancements and ethical resolutions? *The Ethos of Medicine in Postmodern America* is an attempt to examine this question with reference to the cultural touchstones of our postmodern era: consumerism, computerization, corporatization, and destruction of meta narratives. The cultural insights of postmodern thinkers such as Foucault, Deleuze, and Guattari, Lyotard, Baudrillard, Bauman, and Levinas help elucidate the changes in healthcare delivery that are occurring early in the twenty-first century. Although only Foucault among this group actually focused his critique on medical care itself, their combined analysis provides a valuable perspective for gaining understanding of contemporary changes in healthcare delivery. It is often difficult to envision what is happening in the psychosocial/cultural dynamic of an epoch as you experience it. Therefore, it is useful to have a technique for refracting those observations through the lens of another system of thought. The prism of postmodern thought offers such a device with which to view the eclipse of changing medical practice. Any professional practice is always thoroughly embedded in the social and cultural matrix of its society, and the medical profession in America is no exception. In drawing upon the insights of key Continental thinkers such as American scholars, this book does not necessarily endorse the views of postmodernism but trusts that much can be learned from their insight. Furthermore, its analysis is informed by empirical information from health services research and the sociology of medicine. Arnold R. Eiser develops a new understanding of healthcare delivery in the twenty-first century and suggests positive developments that might be nurtured to avoid the barren Silicon Cage of corporate bureaucratized medical practice. Central to this analysis are current healthcare issues such as the patient-centered medical home, clinical practice guidelines, and electronic health records. This interdisciplinary examination reveals insights valuable to anyone working in postmodern thought, medical sociology, bioethics, or health services research.

Haavi Morreim, 2001-08-16 Health care in the US and elsewhere has been rocked by economic upheaval Cost cuts care cuts and confusion abound Traditional tort and contract law have not kept pace Physicians are still expected to deliver the same standard of care including costly resources to everyone regardless whether it is paid for Health plans can now face litigation for virtually any unfortunate outcome even those stemming from society's mandate to keep costs down while improving population health This book cuts through the chaos and offers a clear persuasive resolution Part I explains why new economic realities have rendered prevailing malpractice and contract law largely anachronistic Part II argues that pointing the legal finger of blame blindly or hastily can hinder good medical care Instead of whom do we want to hold liable we should focus first on who

should be doing what for the best delivery of health care When things go wrong each should be liable only for those aspects of care they could and should have controlled Once a good division of labor is identified what kind of liability should be imposed depends on what kind of mistake was made Failures to exercise adequate expertise knowledge skill care effort should be addressed as torts while failures to provide promised resources should be resolved under contract Part III shows that this approach though novel fits remarkably well with basic common law doctrines and can even enlighten ERISA issues With extensive documentation from current case law commentary and empirical literature the book will also serve as a comprehensive reference for attorneys law professors physicians administrators bioethicists and students
