2. meridians or lines of longitude

Map Coordinates

Share with students that most people describe a location using relative location. Relative location is a description of location using the relation of one place to another. To find the exact location of a place, people use absolute location.

To find the absolute location of a place, people use grid coordinates. Tell students that lines of latitude, or parallels, and lines of longitude, or meridians, form a geographic grid. The grid helps to identify points on Earth and record their exact locations north or south of the equator, and east or west of the prime meridian. The coordinates are the latitude and longitude address of a place.
