The Security Society Francis Dodsworth, 2019-05-07

This book provides a critical engagement with the idea of the security society which has been the focus of so much attention in criminology and the social sciences more broadly. Security has been argued to constitute a new mode of social ordering displacing the disciplinary society that Foucault saw as characteristic of the liberal era. He saw a control society or risk society characteristic of Neo Liberalism in which the deviant behaviour of particular individuals as less important than general attempts to offset risk and reduce harm. Dodsworth argues that much of this literature is extraordinarily presentist in orientation denying the long history of attempts to mitigate risk prevent harm and manage security which have always been a part of the government of order. This book develops a critical history of security a thematic analysis of debates about security and aspects of the security society which puts contemporary arguments and practices in dialogue with the texts and practices of the past. In doing so the book develops a cultural analysis of the meanings of security and the way these meanings have been articulated in particular practical contexts in order to understand how the promise of security has so effectively captured the imagination and channeled the effective engagement of people throughout the modern period.

**Counterpredators** Bill Kortenbach, 2012-12-14 Counterpredators is a modern solution to an ancient problem. Parents face the overwhelming responsibility of training their children to navigate the threat environment and safely molding them into powerful self aware authentic adults. At the same time many parents do not themselves possess the necessary skill set and when their children sense this they begin to adopt questionable heroes and role models. In the natural world animal parents train their young by repeatedly exposing them to hazard while demonstrating efficient risk management yet our society teaches us to do the exact opposite. Shelter and protect our children from whatever might harm them. As a result many children are profoundly unprepared to deal with real threat. Since both animal and human young are equally vulnerable it is easy to spot the weak link. The unprepared human parent. To solve this problem parents need to assume a powerful new identity something unique and elemental that rivets the attention and imagination of their children. They must become counterpredators individuals who have the skill and the will to engage and overcome human threats. Counterpredators is the story of how to achieve this transition using cutting edge methodology. Survival Response Conditioning the re activation of dormant subconscious survival skills combined with high pressure scenario based experiences produces rapid permanent change and provides the launch pad for an unbreakable bond of love and respect between parents and children. **Tribe of Survive** J & C, 2012-07-24 You will not learn how to eat a tree but rather how you and your loved ones can live comfortably during the terrible disasters that are surely to come.
