Economic shocks pose a threat to health and health system performance by increasing people's need for health care and making access to care more difficult, a situation compounded by cuts in public spending on health and other social services. But these negative effects can be avoided by timely public policy action. While important public policy levers lie outside the health sector in the hands of those responsible for fiscal policy and social protection, the health system response is critical. This book looks at how health systems in Europe reacted to pressure created by the financial and economic crisis that began in 2008. Drawing on the experience of over 45 countries, the authors analyse health system responses to the crisis in three policy areas: public funding for the health system, health coverage, and health service planning, purchasing, and delivery. They assess the impact of these responses on health systems and population health, identify policies most likely to sustain the performance of health systems facing financial pressure, explore the political economy of implementing reforms in a crisis. The book is essential reading for anyone who wants to understand the choices available to policy makers and the implications of failing to protect health and health system performance in the face of economic and other forms of shock. **Handbook of Research on Entrepreneurship in the Contemporary Knowledge-Based Global Economy** Baporikar, Neeta, 2015-10-21.
