**YSEC Yearbook of Socio-Economic Constitutions 2021** Steffen Hindelang,Andreas Moberg,2022-07-12 This volume addresses contemporary challenges enabled by modern technology that concern upholding freedom of speech where it conflicts with social rights such as respect for private and family life and with economic rights such as the freedom to conduct business or the right to free movement In today s networked world technological shifts happen faster than most people even realize Some of these shifts have made us all potentially powerful media powerful We used to sit in silence in front of newspapers and TV screens and the world was explained to us by just a few sources Today thanks to the Internet

social media and Web 2.0 we can not only share our own thoughts with everyone in a more self-determined way but we can also take part in public debate and even co-shape it ourselves. Of course, the Internet is not a counter design to the communication power structures of the past. Gains in communicative self-determination are threatened due to algorithmisation, platformisation and value extraction from self-created private markets. At the same time, the empowerment of the individual challenges the old grand speakers who are suddenly detecting fake news, echo chambers and filter bubbles everywhere on the Internet. Internet-based communication allegedly hinders us from the one truth as if newspaper hoaxes, propaganda and narrow-mindedness were an invention of the Internet. The current heated debate over fake news, copyright and upload filters shows that we are unsure of how to deal with the newer and more complex phenomena of Internet-based speech. This is due in no small part to the fact that an important benchmark our constitutional compass is still firmly rooted in the past. Constitutions change far more slowly than technologies. Societal changes can drive constitutional changes but what about normative content control? Today there are already demands for old school clarity, truth filters on social media platforms, horrendous sums of liability for platforms that encourage overly thorough cleaning up. However, it is equally true that private individuals regulate; they decide what is found on the Internet and who may post on a given platform. Accounting for all interests at play and striking a fair balance that avoids both a public and private over and under regulation is a complex matter. The authors of this volume not only provide reflections in their highly topical contributions but also share their understanding of what constitutes a fair balance within the larger frame of freedom of speech in a digital age.

**Handbook of Research on the Platform Economy and the Evolution of E-Commerce** Ertz, Myriam, 2021-10-15  
In the past two decades research on electronic commerce and platforms has thrived. Tremendous academic research has been conducted on this specific concept. Over the last decade with the rise of applications and mobile technology that stream of research has extended to the collaborative economy, more colloquially known as the sharing economy. The commonality between e-commerce and collaborative consumption being that they both occur online and rely predominantly on platforms. The Handbook of Research on the Platform Economy and the Evolution of E-Commerce is a comprehensive reference book offering a holistic perspective of the platform economy by connecting the e-commerce and collaborative economy streams into a common framework. As such, this integrated perspective offers a clearer understanding of the key trends in research and in managerial action as well as an agenda for future studies and practice. This handbook emphasizes how the digital transition will create an increased merging between physical and digital activities as well as the challenges and opportunities pertaining to this trend. Covering topics including sharing economy, Marketing 4.0 and digital applications, this book is essential for marketers, managers, executives, students, researchers, and academicians.
