*Controlled Natural Language* Norbert E Fuchs, 2010-07-06 Controlled natural languages CNLs are subsets of natural languages obtained by stricting the grammar and vocabulary in order to reduce or eliminate ambiguity and complexity Traditionally controlled languages fall into two major types those that prove readability for human readers and those that enable reliable automatic semantic analysis of the language The second type of languages has a formal logical basis i.e. they have a formal syntax and semantics and can be mapped to an existing formal language such as first order logic Thus those languages can be used as knowledge representation languages and writing of those languages is supported by fully automatic consistency and redundancy checks query answering etc Wikipedia Various controlled natural languages of the
