Life Is Dangerous

So out we go. It's a habit by now, Freak riding up high on my shoulders and using his little feet to steer me if I forget where we're going. Not that we always know. Freak likes to make things up as he goes along. You think you're just walking down this ordinary sidewalk and really you're crossing this dangerous bridge, the kind made of vines that hangs high up in the air over a deep canyon, and when Freak makes it up it seems so real, you're afraid to look down or you'll get dizzy and fall off the sidewalk.

"Don't ever look down," he says. "Just keep your eyes closed." And then he puts his hands over my eyes and tells me to keep walking straight. "One foot," he says. "Now the next." I'm fighting to keep my balance, and his hands are making me dizzy.

"One more step," Freak says. "Steady. Steady. Now lift up your hoof - I mean your foot. There, we made it!" And he takes his hands away and I see we've crossed the street.

"Go East," he says when I get to the end of the block. "That way, mighty steed! Yonder lies the East!"

I go, "How do you know which way is East?"

And then something is glinting in my eye and Freak is showing me this little compass.

"The Official Cub Scout Compass?"

"That's a clever disguise so you don't know how valuable it is," he says. "This is actually a rare and valuable artifact passed down for generations. Lancelot used it, so did Sir Gawain, and for a time the Black Knight kept it on a chain next to his heart."

I go, "So the Black Knight was a Cub Scout, huh?" and Freak laughs and says, "That way. We go to the East on a secret mission."

We walk for miles. Way beyond the pond and the playground and the school, and for a while we're going through this really ritzy neighborhood of big white houses and blue swimming pools. Freak keeps saying stuff like, "That's the Castle of Avarice," and, "Yonder lies the Bloated Moat," and when we go under trees he'll say, "Proceed with caution," or, "All clear," depending on how low the branches come down.

"We must be East," I say. "Have we got to yonder yet?" because my stupid feet are getting sore, but Freak pats me on the head and says, "Yonder always lies over the next horizon. You could look it up if you don't believe me."

"Oh, I believe you."

On and on, block after block, through all these neighborhoods that Freak says are really secret kingdoms. I'll bet we've gone ten miles at least, because my legs think it's a hundred, and even as light as Freak is, he's starting to feel heavy.

Legend of the Mighty Sparrow Part 2 Bryan Fletcher, 2016-08-17 This science fiction adventure represents the ultimate survivor genre a hero against all odds against powerful special interests too big to fail a system controlled by ultimate insiders who often seem hell bent on obsession the last war escalation and world economic domination to create a brave new world another dystopia And the story focuses on a black site scientist with an urgent mission to reach the next underground bunker with unparalleled destruction and equipment that smolders a place with sections that have damage beyond description beyond all known languages from some unknown experiment as the experiment may have fractured time or seriously damaged a local aspect of the universe As people often say the most important trait is location location location a real estate term regarding a vital place or vulnerable point And in this case the concern is about a weapon of mass destruction a favorite human pursue since prehistoric times and this weapon is not a mother of all bombs not MOAB or the insidious neutron bomb but a new age experiment that directed a complex particle beam at a universal pressure point in space universal defect in spacetime or support aspect well similar to the way someone brings down a high rise building by damaging the main support beam and in this case to collapse the universal wave function as the universe may represent a bubble a supreme algebraic bubble a supreme bulkhead And this secret military experiment one without checks and balances appears to have punctured the universe with a special warp bubble pierce and might

initiate deflation at faster than light speed to deflate the universe as space can move faster than light which in this case will quickly collapse the universe to bring about the End of Days eschatology the final events of history and the ultimate human destiny

The Wild and the Wicked Benjamin Hale, 2024-02-06 A brief foray into a moral thicket exploring why we should protect nature despite tsunamis malaria bird flu cancer killer asteroids and tofu Most of us think that in order to be environmentalists we have to love nature Essentially we should be tree huggers embracing majestic redwoods mighty oaks graceful birches etc We ought to eat granola drive hybrids cook tofu and write our appointments in Sierra Club calendars Nature's splendor in other words justifies our protection of it But asks Benjamin Hale in this provocative book what about tsunamis earthquakes cancer bird flu killer asteroids They are nature too For years environmentalists have insisted that nature is fundamentally good In The Wild and the Wicked Benjamin Hale adopts the opposite position that much of the time nature can be bad in order to show that even if nature is cruel we still need to be environmentally conscientious Hale argues that environmentalists needn't feel compelled to defend the value of nature or even to adopt the attitudes of tree hugging nature lovers We can acknowledge nature's indifference and periodic hostility Deftly weaving anecdote and philosophy he shows that we don't need to love nature to be green What really ought to be driving our environmentalism is our humanity not nature's value Hale argues that our unique burden as human beings is that we can act for reasons good or bad He claims that we should be environmentalists because environmentalism is right because we humans have the capacity to be better than nature As humans we fail to live up to our moral potential if we act as brutally as nature Hale argues that despite nature's indifference to the plight of humanity humanity cannot be indifferent to the plight of nature
