Mark Vicars, Ligia Pelosi, 2023-08-30 This book examines how teaching and learning and teacher and student identities are being reframed in higher education by neoliberal policies and practices It shares how teachers perform teaching and learning duties in relation to prescribed institutional policies and how teachers insert dissonant pedagogies as a critical practice The book explores narrative pedagogy as a disruptive presence and a space for critique It interrogates personal professional experience of educational systems that present educators juggling complexity and meeting competing demands to make learning meaningful for students Each contribution will act as a counterpoint and provide a synoptic method for comparison The book re-constructs meaning from the generic narrative of the public face of education which homogenizes and diminishes collective understandings of teachers and teaching This book provides a contemporary account of the social realities experienced within the higher education classroom across the globe **Handbook of Civic**

Engagement and Education Richard Desjardins, Susan Wiksten, 2022-12-08 Underscoring the complex relationship between civic engagement and education at all stages of life this innovative Handbook identifies the contemporary challenges and best approaches and practices to encourage civic engagement within education **Embodied Learning in**

Educational Theatre Nancy Smithner, 2025-04-29 This book explores embodied teaching practices through applied and physical theatre drawing extensively on the author's rich experience teaching in diverse urban environments including schools colleges and prison settings It presents a groundbreaking conceptualization of embodied practice aimed at fostering personal and social growth through educational theatre Each chapter delves into theories of social transformation supported by qualitative data from student reflections to provide both theoretical and practical insights These insights illustrate how physicalized pedagogy can be effectively used to engage students with socially transformative ideas and identities It also emphasizes the significant role of the facilitator in this process highlighting how they can create an environment that fosters ethical and multicultural awareness in both formal educational settings such as classrooms and informal settings like

community workshops By promoting an ethos of inclusivity and ethical consideration it argues that facilitators can help students navigate and engage with complex social issues through the medium of theatre An accessible and compelling text it aims to inspire educators to adopt innovative methods that promote deeper engagement and understanding among students

Performativity, Politics and Education Peter Roberts, 2022-04-04 This book provides a distinctive perspective on some of the ways in which performativity as an expression of neoliberal and managerialist thinking works in specific policy contexts It pays particular attention to higher education and considers how the logic of performativity reconfigures our sense of what it means to engage in worthwhile research what it means to be well and ultimately what it means to be human Philosophy of education conceived not just as a domain of scholarly activity but as a way of life rubs against the grain of performativity In a performance driven world efficiency measurability and predictability are all important A philosophical life in education is often unpredictable uncertain and inefficient it creates a kind of intellectual restlessness that can never be fully satisfied *Performativity Politics and Education From Policy to Philosophy* suggests that the current obsession with productivity performance and prosperity is misguided It argues that policies and practices underpinned by the principle of performativity are dehumanising and offers an alternative approach an orientation to education grounded in a philosophy of hope and underpinned by a commitment to collegiality constructive critique and ongoing dialogue

Critical Theories, Radical Pedagogies, and Global Conflicts Gustavo Fischman, 2005 We are living in a time of resurgent global conflicts and imperialistic tensions a time in which many children are being left behind by school systems that appear more concerned with developing accountability schemes and standardized models of testing than with defending the right of every child to have access to a good education The efforts of countless teachers activists and families working and living in poor areas around the world are labeled as failures entirely discredited on the basis of their expendability in relation to capital gains or simply ignored In response to these oppressive and challenging conditions this book's contributors a group of committed educators and activists working in an ethos of solidarity across geopolitical and geographical borders have advanced arguments and strategies that link educational transformation to the larger struggle to transform oppressive social relations In a clear attempt to move beyond both nostalgia and romanticism *Critical Theories Radical Pedagogies and Global Conflicts* draws from a range of viewpoints conceptual and thematic transnational and crosscultural First World and Third World to articulate new directions for teachers and activists working to demonstrate that another education and indeed another world is possible
