Integrating Indifference Virginie Van Ingelgom, 2024-08-22 Have European citizens become increasingly Eurosceptic over the last two decades turning their backs on European integration Though many journalists politicians and academics argue that they have this book suggests that reactions to European integration cannot be reduced uniquely to a rise in Euroscepticism but that indifference and ambivalence need also to be brought into the picture when studying EU legitimacy and its politicisation Drawing on new evidence from survey data from eight founding member states and focus groups conducted in francophone Belgium France and Great Britain Integrating Indifference explores the various faces of citizens indifference from fatalism to detachment via sheer indecision This book adopts a pioneering mixed methods approach to analysing the middle of the road attitudes of ordinary citizens who consider themselves neither Europhiles nor Eurosceptics Complementing existing quantitative and qualitative literature in the field it opens up new perspectives on attitudes towards U.S. General Imports ,1977-08 Fidelity Rebates in Competition Law Miroslava European integration Marinova, 2018-11-07 This book examines the treatment of fdelity rebates as one of the most controversial topics in EU competition law The controversy arose from the lack of clarity as to how to distinguish between rebates that constitute a legitimate business practice and those that might have anticompetitive e ects as the same type of rebates could be pro competitive or anticompetitive depending on their e ects on competition This book clarifes the appropriate treatment of fdelity rebates under EU competition law by o ering original insights on the way in which abusive rebates should be identifed taking into account the wealth of EU case law in this area the economics literature and the perspective of US antitrust law The critical discussion on the case law is centred on the idea as to whether the as efcient competitor AEC test is an important part of the assessment of fdelity rebates and in which circumstances it could be used as one tool among others The analysis treats such issues and topics as the following What motivated the EU Courts to treat fdelity rebates as illegal by object Why has this case law drawn so much criticism from academics and other commentators What can we learn from the economic theories of exclusive dealing and fdelity rebates and whether the strict approach of the Courts can be supported by economic empirical studies What is the meaning attached to the notion of an e ects based approach as an expression of the reform of Article 102 Why is the controversy regarding the treatment of fdelity rebates still a live issue after the Intel and the Post

Danmark II judgments In which circumstances the price cost test can be used as a reliable tool to distinguish between anticompetitive and pro competitive fdelity rebates Can we evaluate the e ect of fdelity rebates without necessarily carrying out a price cost test Can we consider the AEC test as a single unifying test for all types of exclusionary abuses What can we learn about the application of the AEC test in fdelity rebate cases from the recent US case law A concluding chapter provides an original perspective and also policy recommendations on how the abusive character of fdelity rebates should be assessed including an appropriate legal test that is administrable creates predictability and legal certainty and minimises the risk of errors and the cost of those mistakes This book takes a giant step towards improving the understanding of the legal treatment of fdelity rebates and understanding as to whether the treatment of fdelity rebates could be e ects based without necessarily carrying out an AEC test It will also contribute significantly to the practical work of enforcement agencies courts and private entities and their advisors book s parallel study of US and EU competition law Simulation in Computational Finance and Economics: Tools and Emerging Applications Alexandrova-Kabadjova, Biliana, Martinez-Jaramillo, Serafin, Garcia-Almanza, Alma Lilia, Tsang, Edward, 2012-08-31 Simulation has become a tool difficult to substitute in many scientific areas like manufacturing medicine telecommunications games etc Finance is one of such areas where simulation is a commonly used tool for example we can find Monte Carlo simulation in many financial applications like market risk analysis portfolio optimization credit risk related applications etc Simulation in Computational Finance and Economics Tools and Emerging Applications presents a thorough collection of works covering several rich and highly productive areas of research including Risk Management Agent Based Simulation and Payment Methods and Systems topics that have found new motivations after the strong recession experienced in the last few years Despite the fact that simulation is widely accepted as a prominent tool dealing with a simulation based project requires specific management abilities of the researchers Economic researchers will find an excellent reference to introduce them to the computational simulation models The works presented in this book can be used as an inspiration for economic researchers interested in creating their own computational models in their respective fields **Innovative practices in the sustainable management of fast-growing trees** Food and Agriculture Organization of the United Nations, IPC, 2025-05-12 Planted forests account for 7 percent of the global forest area covering 290 million hectares ha of land About 131 million ha of planted forests are intensively cultivated for productive purposes with fast growing trees FGTs Fast growing trees have been developed and used for millennia to provide wood and non wood products to rural communities as well as direct and non direct benefits to urban societies Globally FGT plantations are comprised of a variety of tree species in temperate subtropical and tropical biomes. the environment Further this book aims to make this information relevant and accessible to a diverse range of stakeholders involved in the agricultural and forestry sectors including researchers landowners technical operators and planners and policymakers In this context the authors have proposed a comprehensive list of references as part of the methodology In total 43 authors from nine countries have contributed to this book bringing their ideas experience and expertise to advance innovation in FGT science management and policy Business Transformation and Sustainability through Cloud System Implementation Soliman, Fawzy, 2014-09-30 Sustaining a competitive edge in today s business world requires innovative approaches to product service and management systems design and performance Advances in computing technologies have presented managers with additional challenges as well as further opportunities to enhance their business models Business Transformation and Sustainability through Cloud System Implementation presents novel computing technologies designed for use in business and corporate environments enabling managers and associates to make the most of the technologies at their disposal This premier reference work seeks to alert firm management professionals and researchers to the potential risks and benefits associated with emerging technologies and guide firms on the proper selection maintenance and use of Web based computing systems International Finance H. Kent Baker (ed.), Leigh A. Riddick, 2013 Understanding the current state of affairs and tools available in the study of international finance is increasingly important as few areas in finance can be divorced completely from international issues International Finance reflects the new diversity of interest in international finance by bringing together a set of chapters that summarizes and synthesizes developments to date in the many and varied areas that are now viewed as having international content. The book attempts to differentiate between what is known what is believed and what is still being debated about international finance The survey nature of this book involves tradeoffs that inevitably had to be made in the process given the vast footprint that constitutes international finance No single book can cover everything This book however tries to maintain a balance between the micro and macro aspects of international finance Although each chapter is self contained the chapters form a logical whole that follows a logical sequence The book is organized into five broad categories of interest 1 exchange rates and risk management 2 international financial markets and institutions 3 international investing 4 international financial management and 5 special topics The chapters cover market integration financial crisis and the links between financial markets and development in some detail as they relate to these areas In each instance the contributors to this book discuss developments in the field to date and explain the importance of each area to finance as a field of study Consequently the strategic focus of the book is both broad and narrow depending on the reader's needs The entire book provides a broad picture of the current state of international finance but a reader with more focused interests will find individual chapters illuminating on specific topics The Welfare State and Life Transitions Dominique Anxo, Gerhard Bosch, Jill Rubery, 2010 The Welfare State and Life Transitions uses the lens of key life stages to highlight changes in these transitions and in available resources for citizen support within nine

European welfare states This timely book reveals that new life courses are found to require more and not less welfare support but only Sweden has developed an active life course approach and only three more could be considered supportive in at least some life stages For the remainder policies were at best limited or in Italy's case passive. The contributors reveal that the neglect of changing needs is leading to greater reliance on the family and the labour market just as these support structures are becoming more unpredictable and more unequal They argue that alongside these new class inequalities new forms of intergenerational inequality are also emerging particularly in pension provision **U.S. Exports** ,1987 **civil procedure** California,1907 Textbook of Interventional Cardiology E-Book Eric J.
