Friedrich Nietzsche Ses Oeuvres:

Transcendence and the Concrete Jean Wahl, 2016-11-01 Jean Wahl 1888 1974 once considered by the likes of Georges Bataille Gilles Deleuze Emmanuel Levinas and Gabriel Marcel to be among the greatest French philosophers has today nearly been forgotten outside France Yet his influence on French philosophical thought can hardly be overestimated Levinas wrote that during over a half century of teaching and research Wahl was the life force of the academic extra academic and even to a degree anti academic philosophy necessary to a great culture And Deleuze for his part commented that Apart from Sartre who remained caught none the less in the trap of the verb to be the most important philosopher in France was Jean Wahl Besides engaging with the likes of Bataille Bergson Deleuze Derrida Levinas Maritain and Sartre Wahl also played a significant role in some cases almost singlehandedly in introducing French philosophy to movements like existentialism and American pragmatism and literature and thinkers like Hegel Kierkegaard Nietzsche Jaspers and Heidegger Yet Wahl was also an original philosopher and poet in his own right This volume of selections from Wahl s philosophical writings makes a selection of his most important work available to the English speaking philosophical community for the first time Jean Wahl was Professor of Philosophy at the Sorbonne from 1936 to 1967 save during World War II which he spent in the United States having escaped from the Drancy internment camp His books to appear in English include The Pluralist Philosophies of England and America Open Court 1925 The Philosopher s Way Oxford UP 1948 A Short History of Existentialism Philosophical Library 1949 and Philosophies of Existence Schocken 1969

Routledge International Handbook of Visual Research Methods in Anthropology Rupert Cox, Chris Wright, 2025-03-31 Routledge International Handbook of Visual Research Methods in Anthropology approaches the question of method through conceptualisations of the visual world as light sight images and technologies of imaging that can be analysed and described through a range of visual practices in the course of anthropological research The aim of the book is to move beyond making a case for the importance of the visual via its notional arrangement as a subject and means of study in anthropology by showing how it is applied as a way of doing anthropological research through the explication of a series of examples Employing an innovative structure for a handbook each contribution is orientated around a single distinguishing concept and together the contributions addresses the following three issues How to see through images by treating the visual as a form of knowledge made visible A second group of entries is concerned with how to see through time by approaching the visual as a modality for representing duration and rendering legible what may no longer be available to vision Finally a third group of entries deals with the visual at a phenomenal level as a medium that we see in This handbook is a timely and useful resource for both students and researchers of anthropology at this time because the discipline s long standing theoretical and empirically rich practical engagements with visual methods provide valuable insights for the social sciences into current transmutations of the visual into the multimodal the non representational and the sensory The importance of these areas as well as of digital research more generally makes visual

methods ever more important for social scientists hence this handbook is also valuable for those studying general research methods courses and in related fields such as sociology health studies and social work

Nietzsche, Biology and Metaphor Gregory Moore, 2002-01-24 Nietzsche Biology and Metaphor explores the German philosopher's response to the intellectual debates sparked by the publication of Charles Darwin's *The Origin of Species*. By examining the abundance of biological metaphors in Nietzsche's writings Gregory Moore questions his recent reputation as an eminently subversive and post modern thinker and shows how deeply Nietzsche was immersed in late nineteenth century debates on evolution degeneration and race. The first part of the book provides a detailed study and interpretation of Nietzsche's much disputed relationship to Darwinism. Uniquely Moore also considers the importance of Nietzsche's evolutionary perspective for the development of his moral and aesthetic philosophy. The second part analyzes key themes of Nietzsche's cultural criticism his attack on the Judeo-Christian tradition his diagnosis of the nihilistic crisis afflicting modernity and his anti-Wagnerian polemics against the background of fin de siècle fears about the imminent biological collapse of Western civilization.

Historical Traces and Future Pathways of Poststructuralism Gavin Rae, Emma Ingala, 2020-11-11 This volume brings together an international array of scholars to reconsider the meaning and place of poststructuralism historically and demonstrate some of the ways in which it continues to be relevant especially for debates in aesthetics ethics and politics. The book's chapters focus on the works of Butler Deleuze Derrida Foucault Irigaray Kristeva Lacan and Lyotard in combination with those of Agamben Luhman Nancy and Nietzsche and examine issues including biopolitics culture embodiment epistemology history music temporality political resistance psychoanalysis revolt and the visual arts. The contributors use poststructuralism as a

hermeneutical strategy that rejects the traditional affirmation of unity totality transparency and representation to instead focus on the foundational importance of open ended becoming difference the unknowable and expression This approach allows for a more expansive definition of poststructuralism and helps demonstrate how it has contributed to debates across philosophy and other disciplines Historical Traces and Future Pathways of Poststructuralism will be of particular interest to researchers in philosophy politics political theory critical theory aesthetics feminist theory cultural studies intellectual history psychoanalysis and sociology **The Collaborative Bibliography of Women in Philosophy** Noël Hutchings,1997
