

## Before Setting Oven Controls

Fig. 1

### Oven Vent Location

The oven vent is located under the left side of the control panel (See Fig. 1). When the oven is on, warm air passes through the vent. This venting is necessary for proper air circulation in the oven and good baking results. **DO NOT BLOCK OVEN VENT.**

### Removing & Replacing Oven Racks

**To remove,** pull the rack forward until it stops. Lift up front of rack and slide out. **To replace,** fit the rack onto the guides on the oven walls. Tilt the front of the rack upward and slide the rack back into place.

### Arranging Oven Racks & Roasting Shelf

**ALWAYS ARRANGE OVEN RACKS WHEN THE OVEN IS COOL (PRIOR TO OPERATING THE OVEN).** Always use oven mitts when using the oven.

#### Recommended Rack Positions for Broiling, Baking & Roasting:

Food	Rack Position
Broiling hamburgers & steaks	See broiling
Broiling meats, chicken or fish	See broiling
Cookies, cakes, pies, biscuits & Muffins	3 or 4
Frozen pies, angel food cake, yeast, bread, casseroles, small cuts of meat or poultry	1
Turkey, roast or ham	use Roasting Shelf (some models)

### Types of Oven Racks & Roasting Shelf

Your range may be equipped with one or more of the oven rack types shown: **Flat Oven Rack** (Fig. 5) and **Roasting Shelf** (Fig. 6; some models). To maximize cooking space the Roasting Shelf should be used in the lowest rack position to roast large cuts of meat and poultry (See Fig. 2).

Place **Roasting Shelf** with care in the lowest rack position (Refer to Fig. 2; some models). Be sure the Roasting Shelf is level and the front end of the shelf rests over the front ends of the oven rack glides on both sides of the oven interior (Refer to Figs. 3 & 4).

### Baking Layer Cakes with 1 or 2 Oven Racks

For best results when baking cakes using 2 oven racks, place cookware on rack positions 2 & 4 (See Fig. 7). For best results when using a single Flat Oven Rack, place cookware on rack position 3 or 4 (See Fig. 8).

### Air Circulation in the Oven

For best air circulation and baking results allow 2-4" (5-10 cm) around the cookware for proper air circulation and be sure pans and cookware do not touch each other, the oven door, sides or back of the oven cavity. The hot air must be able to circulate around the pans and cookware in the oven for even heat to reach around the food.
