evolved from the ARW are 1 A continued need exists to develop formal theoretical frameworks for the architecture of such systems together with a reflection on the concept of intelligence 2 There is a need to focus greater attention to the role that the human play in controlling intelligent systems The workshop began by considering the typical features of an intelligent system The complexity associated with multi resolutional architectures was then discussed leading to the identification of a necessity for the use of a combinatorial synthesis approach This was followed by a session on human interface issues
