Nexus 5 Survival Guide Toly K, 2014-01-14 The Nexus 5 is Google's first phone to natively run Android Kit Kat. As a result, the Nexus 5 is packed full of new features never before seen on any Android phone, such as a much improved Phone application, better voice searching, built-in caller ID that automatically searches the web for the phone number, and a completely redesigned text and video chat application. This guide will introduce you to these new features and show you how to use them. This book gives task-based instructions without using any technical jargon. Learning which buttons perform which functions is useless unless you know how it will help you in your everyday use of the Nexus 5. Therefore, this guide will teach you how to perform the most common tasks. Instead of presenting arbitrary instructions in lengthy paragraphs, this book gives unambiguous, simple step-by-step procedures. Additionally, detailed screenshots help you to confirm that you are on the right track. This Survival Guide also goes above and beyond to explain secret Tips and Tricks to help you accomplish your day-to-day tasks much faster. If you get stuck, just refer to the Troubleshooting section to figure out and solve the problem.

The (Unofficial) Google Nexus 5 SmartPhone Book UnofficialBooks, 2013-11-26 NOTE While this edition is good value, there is a newer edition: *The Unofficial Google Nexus 5 SmartPhone Book Second Edition*. The Google-designed and LG-manufactured Nexus 5 is the first smartphone to run the Android 4.4 KitKat operating system. If you've just bought a Nexus 5 smartphone or you're thinking about buying one, you should read this book. The ethos of the book is very much: "What the Nexus 5 can do for you, and it's an unofficial book because we have not colluded with the manufacturers Google or LG during the writing of the book, so we can say pretty much whatever we want. And if we say we like it, it's because we really do. But we're no fan boys, and we don't mind giving a warts-and-all coverage where it's warranted. So whether you're so far undecided or have already purchased your Nexus 5, buy this book. And look out for similar books at unofficialbooks.info." CONTENTS 1

Mobile Security Products for Android Philipp Kratzer, Christoph Gruber, Andreas Clementi, David Lahee, Philippe Rödlach, Peter Stelzhammer, 2014-10-14 We have once again tested security products for smartphones running Google's Android operating system Our report covers details of the products made by leading manufacturers Smartphones represent the future of modern communications In 2013 more than 1 billion smartphones were sold a further milestone in the advance of these devices¹ A study published by Facebook emphasises the importance of smartphones in our lives about 80% of users make use of their smartphone within 15 minutes of waking up each day At the same time the traditional function of a telephone is becoming less and less important The high quality of integrated cameras means that the smartphone is increasingly used for photography As well as with photos users trust their devices with their most personal communications such as Facebook WhatsApp and email This brings some risks with it as such usage makes the smartphone interesting for criminals who attempt to infect the device with malware or steal personal data There is also the danger brought by phishing attacks These days the use of security software on a PC or laptop is seen as essential However many smartphone users do not yet have the same sense of responsibility even though their devices store personal data private photos Internet banking information or even company data As modern smartphones are often expensive to buy they are also an attractive target for thieves Top quality smartphones cost several hundred Euros As it is not possible to physically prevent them from being stolen they must be made less attractive to thieves Consequently many of today's security products contain not only malware protection but also highly developed theft protection functions which make the device less attractive to thieves e.g. by locking the device and help the owner to find it again
