Tectonic Geomorphology of Mountains

William B. Bull,2008-04-15 With a balance of theory and practical applications Tectonic Geomorphology of Mountains is essential reading for research geologists and upper level undergraduate and graduate students in the earth sciences This book describes how tectonic events influence geomorphic processes and explores how landscapes respond to tectonic deformation in the ways in which they are weathered washed and abraded Uses new approaches to enhance theoretical models of landscape evolution and to solve practical problems such as the assessment of earthquake hazards Includes previously unpublished research and theory Examines how to use key landforms as reference levels in changing landscapes estimate rates of mountain range uplift and map seismic shaking caused by prehistorical earthquakes Presents a diverse range of examples from around the world *Geomorphology of Desert Environments* Anthony J. Parsons,A. D.

Abrahams,2009-03-20 About one third of the Earth s land surface experiences a desert climate and this area supports approximately 15% of the planet s population This percentage continues to grow and with this growth comes the need to acquire and apply an understanding of desert geomorphology Such an understanding is vital in managing scarce and fragile resources and in mitigating natural hazards This authoritative reference book is comprehensive in its coverage of the geomorphology of desert environments and is arranged thematically It begins with an overview of global deserts proceeds through treatments of weathering hillslopes rivers piedmonts lake basins and aeolian surfaces and concludes with a discussion of the role of climatic change Written by a team of international authors all of whom are active in the field the chapters cover the spectrum of desert geomorphology *History of Geomorphology and Quaternary Geology* R. H.

Grapes,2008 These papers deal with various aspects of the histories of geomorphology and Quaternary geology in different parts of the world They include the origin of the term Quaternary histories of ideas and debates relating to aspects of fluvial geomorphology glacial geomorphology and glaciation desert dunes and the geology of Australia peneplains in China a palaeo Tokyo Bay in Japan together with biographies of Charles Cotton Valerija epulyt and eslovas Pakuckas that highlight their respective contributions to the disciplines of geomorphology and Quaternary geology **Research Note PSW.** ,1978

Professional Paper ,1980 Earth Surface Processes Philip A. Allen,2009-05-27 Earth Surface Processes is an introductory text for those studying the dynamics of fluid and sediment transport in the environments in the context of both present day patterns as well as the environmental changes decipherable in the geological record The book is divided into two parts The first deals with the global scale aspects of the earth s surface system The second part focuses on the physical underpinnings for fluid and sediment transport in a number of settings found at the earth s surface and in its oceans Earth Surface Processes fits into the literature of the broad holistic discipline of Earth System Science The author illustrates the physical principles of earth s surface processes and explains the relevant theories by quantitative practical exercises The pioneering textbook on the new sedimentology One of the first textbooks to adopt the Earth Systems approach to geology developed at Penn State and Stanford Should reinvigorate more traditional courses in physical sedimentology and dynamical sedimentology Successfully marries the innovative holistic approach to Earth Systems with the traditional reductionist approach to sedimentary processes Explains both the global scale Earth Surface System and the fluid dynamics and sedimentary transport processes that underlie this Quantitative approach is reinforced with worked examples and solutions Richly illustrated with original diagrams and a colour plate section
