

Changeling life cycle

Adult Changelings are capable of altering their appearance at will to hunt and reproduce. A Changelings diet consists mainly of love. Ponies possess the most delicious love and are preferred targets. Changelings have been known to replace Ponies in order to feed off of their love and affection. The Pony that is to be replace is impregnated as Changeling infants will consume their hosts after birth. Left undiscovered, this arrangement can continue indefinitely.

A common belief is that Changelings will replace Pony babies with one of their own. This is only half true, as there was never a Pony baby to begin with, only a new dinner guest.
