Flat Earth Valentin Matcas, 2018-04-20 Is the Earth flat or spherical There is only one way to find out the truth Just go up there in the orbit of Earth see it for yourself and then come back to tell us the story You may always rely on everything that others claim officially or not that the Earth is flat or spherical but when all their statements and proofs remain inconclusive since they did not go up there in the orbit of Earth to see it themselves regardless of what they may claim you have to keep searching Yet when you study the current science with all its space missions and space records even these remain inconclusive as though space missions have never reached past the lower orbit of Earth themselves Therefore now we have additional important questions to ask besides those regarding the true shape of Earth Is there anything at all past the lower orbit of Earth No according to all space records regardless of what science may claim Because as long as you cannot go past the lower orbit of Earth as an individual or as an entire valid space mission to see everything yourself and as long as the current science remains incapable to provide the necessary scientific evidence stating that the Earth is spherical and that our world spans past the lower orbit of Earth as we see in the sky then everyone the entire humanity remains incapable to prove that Earth is flat or spherical Since just as all flatearththers and planoterrestrials out there struggle to prove that the Earth is flat now you have the entire science with its entire army of millions of employed scientists incapable to prove that Earth is spherical and that there is anything out there past the lower orbit of Earth Because this unique circumstance questions not only the accurate shape of Earth not only the pertinence and reliability of the current science but it questions the meaning and nature of this entire world And if you are only starting your

search for truth right now to see if Earth could be flat and not spherical there is significantly more going on than contorted science and fake space missions while you should research harder to find out truth Because you cannot simply solve a mathematical equation here at the surface of Earth to find out its shape and nature while you cannot rely on science to tell you the truth as it lies persistently and now you have to figure out everything on your own Yet there are still ways to tell if Earth is spherical or flat by the laws of physics here at the surface of Earth matching space objects or flat surfaces or matching rotating objects or stationary ones as we will see shortly in the book Yet you always have to be careful throughout your studies because many times created realities are made with the main intention to seem larger and therefore more credible fooling you the entire time While dreams and videogames do just the same And therefore now you have to consider these details just as well along with much more This book creates a comprehensive model of Earth and of the entire world studying its shape boundaries characteristics and social circumstances using reasoning and accurate facts This research of the true shape and nature of Earth is done from all perspectives scientific empiric social cognitive existential and spiritual

Posthuman Capital and Biotechnology in Contemporary Novels Justin Omar Johnston,2019-10-01 This book examines several distinctive literary figurations of posthuman embodiment as they proliferate across a range of internationally acclaimed contemporary novels clones in Kazuo Ishiguro s Never Let Me Go animal human hybrids in Margaret Atwood s Oryx and Crake toxic bodies in Indra Sinha s Animal s People and cyborgs in Jeanette Winterson s The Stone Gods While these works explore the transformational power of the biotech century they also foreground the key role human capital theory has played in framing human belonging as an aspirational category that is always and structurally just out of reach making contemporary subjects never human enough In these novels the dystopian character of human capital theory is linked to fantasies of apocalyptic release As such these novels help expose how two interconnected genres of futurity the dystopian and the apocalyptic work in tandem to propel each other forward so that fears of global disaster become alibis for dystopian control which in turn becomes the predicate for intensifying catastrophes In analyzing these novels Justin Omar Johnston draws attention to the entanglement of bodies in technological environments economic networks and deteriorating ecological settings

Worshipping Siva and Buddha Ann R. Kinney,Marijke J. Klokke,Lydia Kieven,2003-01-01 The Temple Art of East Java a study of the temples created in East Java between the tenth and sixteenth centuries fills an important scholarly lacuna The arts of Central Java home of the great Buddhist monument Borobudur and Hindu Prambanan have been given thorough scholarly attention The architectural and sculptural treasures of the East Javanese kingdoms of Kadir Singasari and Majapahit are little known in comparison yet beautiful and significant in Indonesian history The author presents the major sites of these three historical periods and discusses their architecture and sculpture The many narrative reliefs illustrating sacred and secular literature have been painstakingly identified The reader is thus able to follow their stories and understand where why and how they fit into the visual program planned for each temple and their relation to historical events and the wayang theater These descriptions are augmented by extensive site summaries Superb color photography supports the text throughout and is a major contribution in itself The book contains a wealth of information that is not available all together in any other publication Not only are the descriptions of the monuments valuable but the author identifies numerous sculptures in collections around the world that were once associated with the East Javanese temples discussed The attempted reconstruction of sculptural programs at the sites is extremely important To understand an ancient Javanese stone sculpture knowledge of its original cultural context is required rather than its current location on a stand in some museum Today with the number of fakes appearing on the art market such associations are invaluable for dating and authenticating stone sculpture said to come from unidentified East Javanese sites
