Racism Robert T. Carter, Alex L. Pieterse, 2020-07-21 A large body of research has established a causal relationship between experiences of racial discrimination and adverse effects on mental and physical health In *Measuring the Effects of Racism* Robert T. Carter and Alex L. Pieterse offer a manual for mental health professionals on how to understand, assess, and treat the effects of racism as a psychological injury. Carter and Pieterse provide guidance on how to recognize the psychological effects of racism and racial discrimination. They propose an approach to understanding racism that connects particular experiences and incidents with a person's individual psychological and emotional response. They detail how to evaluate the specific effects of race-based encounters that produce psychological distress and possibly impairment or trauma. Carter and Pieterse outline therapeutic interventions for use with individuals and groups who have experienced racial trauma, and they draw attention to the importance of racial awareness for practitioners. The book features a racial trauma assessment toolkit including a race-based traumatic stress symptoms scale and interview schedule. Useful for both scholars and practitioners, including social workers, educators, and counselors, *Measuring the Effects of Racism* offers a new framework of race-based traumatic stress that helps legitimize psychological reactions to experiences of racism.

The Praeger Handbook on Women's Cancers Michele A. Paludi, 2014-05-28 Written by experts in psycho-oncology, this book synthesizes the findings of the latest research on women's cancers to empower women to make informed choices about treatment options. Each year, hundreds of thousands of women are diagnosed with cancer in the United States alone. The total number affected is larger still, comprising siblings, parents, partners, and children of these women. In this single volume, an international team of experts addresses the physical, medical, and psychological matters that are triggered by a diagnosis of having a form of women's cancer: breast, cervical, endometrial, gestational ovarian, uterine, vaginal, and vulvar, being some of the more common. The handbook examines and explains each type of women's cancer, covering the specifics of incidence, diagnosis, treatment options, and more, providing an up-to-date guide for women and their families to assist in making informed choices about their treatment options. The book includes personal accounts from women who survived cancers and beat their emotional challenges, addresses myths versus realities regarding women's cancers, and covers relevant related topics such as race, sexual orientation, religion, and cancer coping. Special attention is given to the impact of women's cancers on relationships, intimacy, and body image, as well as
