HP 35s Scientific Calculator Merri Meierotto, 2021-03-03 While the focus is on the HP 35s many of the concepts discussed can be used with most programmable calculators Equally important to the programming approaches are the proposed techniques for monitoring the moves of multiple players and the demonstration of a strategy for offensive and defensive play The HP 35s User's Guide book is an attempt to supplement the HP 35s User's Guide for those things this author had trouble understanding or discovered only after trial and error It concentrates on topics such as programming using memory using Reverse Polish Notation RPN using stack registers program construction and working with equations the equation solver The book is a general programming guide rather than a how to guide for specific specialty areas It does not discuss integration mathematical transformations logical operations or conversion factors It assumes RPN Reverse Polish Notation throughout The HP 35s User's Guide book does not cover every aspect of the HP 35s Therefore it is important to have the HP 35s User's Guide which is available free online
