Handbook of Data-Based Decision Making in Education Theodore Kowalski, Thomas J. Lasley, 2010-04-15 Education has fought long and hard to gain acceptance as a profession and since professionals by definition use data to shape the decisions they make education has little choice but to continue moving in this direction This 3 part handbook represents a major contribution to the literature of education It is a unique compendium of the most original work currently available on how when and why evidence should be used to ground practice It is a comprehensive cross disciplinary research based and practice based resource that all educators can turn to as a guide to data based decision making The Handbook of Data Based Decision Making in Education is a must read for researchers who are just beginning to explore the scientifically based nature of educational practice It is also appropriate for policy makers and practitioners who are confronted with young people who need to be in classrooms where best practices are the norm and not the exception **Department of Defense**
