The 19th Annual Meeting of the European Conference on Object Oriented Programming ECOOP 2005 took place during the last week of July in Glasgow Scotland UK This volume includes the refereed technical papers presented at the conference and two invited papers It is traditional to preface a volume of proceedings such as this with a note that emphasizes the importance of the conference in its respective field Although such self evaluations should always be taken with a large grain of salt ECOOP is undisputedly the pre eminent conference on object orientation outside of the United States In its turn object orientation is today s principal technology not only for programming but also for design analysis and specification of software systems As a consequence ECOOP has expanded far beyond its roots in programming to encompass all of these areas of research which is why ECOOP has remained such an interesting conference But ECOOP is more than an interesting conference It is the nucleus of a technical and academic community a community whose goals are the creation and dissemination of new knowledge Chance meetings at ECOOP have helped to spawn collaborations that span the boundaries of our many subdisciplines bring together researchers and practitioners cross cultures and reach from one side of the world to the other The ubiquity of fast electronic communication has made maintaining these collaborations easier than we would have believed possible only a dozen years ago But the role of conferences like ECOOP in establishing collaborations has not diminished **Integrating Security and Software Engineering: Advances and Future Visions** Mouratidis,

Creativity and Rationale John M. Carroll, 2012-07-26 Creativity and rationale comprise an essential tension in design They are two sides of the coin contrary complementary but perhaps also interdependent Designs always serve purposes They always have an internal logic They can be queried explained and evaluated These characteristics are what design rationale is about But at the same time designs always provoke experiences and insights They open up possibilities raise questions and

engage human sense making Design is always about creativity Creativity and Rationale Enhancing Human Experience by Design comprises 19 complementary chapters by leading experts in the areas of human computer interaction design sociotechnical systems design requirements engineering information systems and artificial intelligence Researchers research students and practitioners in human computer interaction and software design will find this state of the art volume invaluable

Software engineering research can trace its roots to a few highly influential individuals Among that select group is Leon J Osterweil who has been a major force in driving software engineering from its infancy to its modern reality For more than three decades Prof Osterweil's work has fundamentally defined or significantly impacted major directions in software analysis development tools and environments and software process all critical parts of software engineering as it is practiced today His exceptional contributions to the field have been recognized with numerous awards and honors through his career including the ACM SIGSOFT Outstanding Research Award in recognition of his extensive and sustained research impact and the ACM SIGSOFT Influential Educator Award in recognition of his career long achievements as an educator and mentor In honor of Prof Osterweil's profound accomplishments this book was prepared for a special honorary event held during the 2011 International Conference on Software Engineering ICSE It contains some of his most important published works to date together with several new articles written by leading authorities in the field exploring the broad impact of his work in the past and how it will further impact software engineering research in the future These papers part of the core software engineering legacy and now available in one commented volume for the first time are grouped into three sections flow analysis for software dependability the software lifecycle and software process **Verification of Infinite-State Systems**

with Applications to Security E. Clarke, M. Minea, F.L. Tiplea, 2006-01-12 The recent years have brought a number of advances in the development of infinite state verification using techniques such as symbolic or parameterized representations symmetry reductions abstractions constraint based approaches combinations of model checking and theorem proving The active state of research on this topic provides a good time point to increase impact by bringing together leading scientists and practitioners from these individual approaches This volume gives an overview of the current research directions and provides information for researchers interested in the development of mathematical techniques for the analysis of infinite state systems
