Investigating Current Professional Indemnity Insurance Practices of Architects in Namibia Aldon Plaatjie, Namibia Council for Architects and Quantity Surveyors, 2014 The research is focused on professional indemnity insurance for architects in Namibia Professional indemnity insurance is not currently provided for in both the Architects and Quantity Surveyors Act Act 13 of 1979 of Namibia or contracts used by architects in Namibia The absence of professional indemnity insurance in contracts used by the Namibian built environment must be addressed in order to create awareness of the risks involved in practising without professional indemnity insurance This study will contribute to the knowledge of architectural practise in Namibia by emphasising the evident gaps in the existing contract data namely the Architect s and Quantity Surveyor s Act Act 13 of 1979 and the Client Architect Agreement of the Namibia Council for Architects and Quantity Surveyors It is envisioned that passing a bill in parliament making professional indemnity insurance compulsory for all registered professionals will benefit the Namibian architectural environment An applied research model is selected by implementing triangulation The approach starts broadly in the architectural environment of Namibia addressing issues of contracting and governing legislations before focusing specifically on professional indemnity insurance and the need for it in the Namibian built environment
