The Body of God D Dennis Hudson, 2008-09-25 This book is the crowning achievement of the remarkable scholar D Dennis Hudson bringing together the results of a lifetime of interdisciplinary study of south Indian Hinduism The book is a finely detailed examination of a virtually unstudied Tamil Hindu temple the Vaikuntha Perumal ca 770 C E Hudson offers a sustained reading of the temple as a coherent organized minutely conceptualized mandala Its iconography and structure can be understood in the light of a ten stanza poem by the Alvar poet Tirumangai and of the Bhagavata Purana and other major religious texts even as it in turn illuminates the meanings of those texts Hudson takes the reader step by step on a tour of the temple telling the stories suggested by each of the 56 sculpted panels and showing how their relationship to one another brings out layers of meaning He correlates the stories with stages in the spiritual growth of the king through the complex rituals that formed a crucial dimension of the religion The result is a tapestry of interpretation that brings to life the richness of spiritual understanding embodied in the temple Hudson s underlying assumption is that the temple itself constitutes a summa theologica for the Pancharatra doctrines in the Bhagavata tradition centered on Krishna as it had developed through

the eighth century This tradition was already ancient and had spread widely across South Asia and into Southeast Asia By interweaving history with artistic liturgical and textual interpretation Hudson makes a remarkable contribution to our understanding of an Indian religious and cultural tradition *The White Shaman Mural* Carolyn E. Boyd, Kim Cox, 2016-11-29 Winner Society for American Archaeology Book Award 2017 San Antonio Conservation Society Publication Award 2019 The prehistoric hunter gatherers of the Lower Pecos Canyonlands of Texas and Coahuila Mexico created some of the most spectacularly complex colorful extensive and enduring rock art of the ancient world Perhaps the greatest of these masterpieces is the White Shaman mural an intricate painting that spans some twenty six feet in length and thirteen feet in height on the wall of a shallow cave overlooking the Pecos River In *The White Shaman Mural* Carolyn E Boyd takes us on a journey of discovery as she builds a convincing case that the mural tells a story of the birth of the sun and the beginning of time making it possibly the oldest pictorial creation narrative in North America Unlike previous scholars who have viewed Pecos rock art as random and indecipherable Boyd demonstrates that the White Shaman mural was intentionally composed as a visual narrative using a graphic vocabulary of images to communicate multiple levels of meaning and function Drawing on twenty five years of archaeological research and analysis as well as insights from ethnohistory and art history Boyd identifies patterns in the imagery that equate in stunning detail to the mythologies of Uto Aztecan speaking peoples including the ancient Aztec and the present day Huichol This paradigm shifting identification of core Mesoamerican beliefs in the Pecos rock art reveals that a shared ideological universe was already firmly established among foragers living in the Lower Pecos region as long as four thousand years ago *ECAI 2006* Gerhard Brewka, 2006 In the summer of 1956 John McCarthy organized the famous Dartmouth Conference which is now commonly viewed as the founding event for the field of Artificial Intelligence During the last 50 years AI has seen a tremendous development and is now a well established scientific discipline all over the world Also in Europe AI is in excellent shape as witnessed by the large number of high quality papers in this publication In comparison with *ECAI 2004* there s a strong increase in the relative number of submissions from Distributed AI Agents and Cognitive Modelling Knowledge Representation Reasoning is traditionally strong in Europe and remains the biggest area of *ECAI 2006* One reason the figures for Case Based Reasoning are rather low is that much of the high quality work in this area has found its way into prestigious applications and is thus represented under the heading of PAIS
