*Key Factors in Postgraduate Research Supervision A Guide for Supervisors* Dario Toncich, 2022-09-01 Key Factors in Postgraduate Research Supervision A Guide for Supervisors is designed to inform and support university academics and researchers who are taking on the responsibilities of postgraduate research student supervision It is aimed at early career professionals who may be undertaking supervision for the first time and also

experienced supervisors seeking to develop a more formal framework for their supervision in an increasingly complex academic environment. The objective of the book is to help supervisors create the complete postgraduate student. That is an individual who can develop the rigors and disciplines of research conduct and research writing as well as a broader understanding of the environment in which many postgraduate qualified professionals will work. The majority of postgraduate research students in the modern world ultimately use their acquired skills to work outside the university research environment so emphasis is given to preparing research students for these varied roles which can include management commercial research or start up company pathways. Any competent academic can be a good research supervisor when things are going well. Real supervisory skills only come into play when things have gone awry. That is when a professional and structured approach to problem solving and conflict resolution is required. This book seeks to provide the framework in which supervisors can develop such an approach. The topics covered in this text cover the spectrum of the supervisory process from understanding the university research environment through to recruiting students induction planning of the research program peer review and thesis dissertation preparation. Additionally important peripheral issues such as preparing graduates for various future roles managing collaborative research programs managing cases of misfeasance and developing long term relationships with students are also covered.
