**Proceedings of the International Conference Theory and Applications in the Knowledge Economy TAKE 2019** Florian Kragulj, 2019-07-10

Ten years is a long time In 2009 a bunch of friends gathered in Portugal for a conference that was to precede TAKE In 2011 we repeated Then after a strange sequence of events we finally organized TAKE for the first time in 2015 in Aveiro followed by Zagreb Poznan and now Vienna Florian Kragulj was in the first TAKE in Aveiro and from the start showed the highest level of enthusiasm and professionalism in the event These characteristics were kept alive during all the 15 or so months during which we organized TAKE 2019 That this edition of TAKE involves several entities linked with academia i e WU Vienna University of Economics and Business the Austrian Economic Chamber and the Institute for Applied Research on Skilled Crafts and Trades IAGF This in itself a big success and a sign of the Conference improvement Also we may see by analysing the papers and in particular the streams that TAKE has been following the economic times and this year we have several papers on the Gig Economy Only good conferences adjust the others get stuck in time And success in Conferences is about teams And in TAKE that team is indeed a very large group of people including the co chairs the local organizing team the material organizers Book of Abstracts and Proceedings the stream leaders and the paper reviewers without all these persons nothing could have been done And finally we had to depend on the authors and their willingness to work with us Without the work of these large dozens of devoted and skilled people TAKE 2019 would not have existed May I also mention that this time and with Florian s impulse and skill the organization of TAKE was improved in technological terms in short we became techno we used a website to deliver the mail list a website to receive the scientific material and another website to receive the fees All these were investments that eventually paid off and that will guarantee a more stable organization for TAKE in the future And we owe it to Florian However as the Human Resource Development part of TAKE and more than anyone Gary Mc Lean would remind us We are humans Eduardo and technology helps but in the end is attention to detail capacity to deal with the bizarre and to accommodate the weirdness making sometimes the impossible possible that differentiates a good conference made doing things right from an excellent conference based in doing the right things And on this last matter believe me we in TAKE are among the best in the world because apart from being outstanding scholars and good colleagues we are an amazing group of friends and friendship is the best way to turn good conferences into outstanding ones Many thanks from the heart and enjoy the Conference Eduardo Tom Conference Chair Universidade Europeia Lisbon July 2019 Lisbon Portugal

Epigenetics Rosaria Meccariello, 2019-09-11 Epigenetic changes are heritable and reversible modifications that significantly affect gene expression without any change in DNA sequence The epigenetic signature is remodelled during the lifespan as a direct consequence of both environment and lifestyle Therefore health or disease status strongly depends on epigenetic marks This book summarizes the current knowledge in the field and includes

chapters on epigenetics in plants and epigenetics in health and disease It is written for a wide audience of basic and clinical scientists teachers and students interested in gaining a better understanding of epigenetics

**New Approaches to Death in Cities during the Health Transition** Diego Ramiro Fariñas, Michel Oris, 2016-11-14 This book presents recent efforts and new approaches to improve our understanding of the evolution of health and mortality in urban environments in the long run looking at transformation and adaptations during the process of rapid population growth In a world characterized by large and rapidly evolving urban environments the past and present challenges cities face is one of the key topics in our society Cities are a world of differences and consequently of inequalities At the same time cities remain above all the spaces of interactions among a variety of social groups the places where poor middle class and wealthy people as well as elites have coexisted in harmony or tension Urban areas also form specific epidemiological environments since they are characterized by population concentration and density and a high variety of social spaces from wealthy neighborhoods to slums Inversely and coherently cities develop answers in terms of sanitary policies and health infrastructures This balance between risk and protective factors is however not at all constant across time and space and is especially endangered in periods of massive demographic growth particularly periods of urbanization mainly led by immigration flows that transform both the socioeconomic and demographic composition of urban populations and the morphological nature of urban environments Therefore this book is an unique contribution in which present day and past socio demographic and health challenges confronted by big urban environments are combined
