Game-playing for active ageing and healthy lifestyles Ana Isabel Veloso,Liliana Vale Costa,2022-09-01 Given the increase in the ageing population and the evolvement of the Human Computer Interaction field to a much more humanistic approach debate is ongoing about designing technology enabled products for active ageing and healthy lifestyles Indeed the mainstream game industry has been challenged with the emergence of an older target group the advancements in gamification and the proliferation of SMART devices Previous experience in the field has revealed that for many older adult gamers games had a therapeutic effect through them being both cognitively challenged and rewarded However it has also revealed that the gaming industry was not fulfilling their other motivations and accessibility needs Furthermore research to date has focused on the physical and cognitive effects of video games in the aging process Up to now the use of other active ageing dimensions that go beyond the health domains i.e sense of security and participation in society in games addressed to this target group remain unexplored This book differs from current books on the market by focusing on games and the main implications to design for active ageing in terms of the market perspective the information and communication society behavioral design mobility urban and city planning accessibility and assessment

Mediation in state courts Flávia Maria Aires Freire Allemão, 2021-10-29 The large caseloads to be tried in the courts and the dissatisfaction of jurisdictions with the judgments are the main reasons for the application of mediation in the courts The culture of litigation and the Civil Law system applied in Brazil are driving factors in order to arise more lawsuits given to a greater possibility of different decisions for similar situations in contrast to the Common Law applied in almost all of the United States where the citizen is more cautious when filing lawsuits because it is more difficult to reverse a precedent Given the need to change this situation a movement began in Brazil to encourage agreements between the parties in the process with the National Council of Justice having issued the Resolution No 125 2010 instituting mediation and later the provision of such institute by the new Code of Civil Procedure of 2015 The previous Code of Civil Procedure from 1973 already regulated conciliation although it does not have the same effectiveness as mediation in the resolution of conflicts in a more definitive way especially in demands whose conflict parties have a continued relationship among themselves such as those involving Family Law for example Indeed among the different types of alternative methods of conflict resolution mediation is within the best results So it is of fundamental importance the comparative study of the mediation in Brazil and the United States analyzing the participants of mediation the types of mediation how it is applied in practice in each country the advantages and disadvantages and thinking how to improve the institute of mediation in both countries considering the differences and similarities between them

Rebuilding Sustainable Communities with Vulnerable Populations after the Cameras Have Gone Adenrele Awotona, 2012-03-15 This volume focuses on the status of the elderly and the disabled after disasters globally as well as the challenges of post earthquake rebuilding in Haiti The International Federation of the Red Cross and Red Crescent Societies has estimated that between 1987 and 2007 about 26 million older people were affected each year by natural disasters alone and that this figure could more than double by 2050 due to the rapidly changing demographics of ageing People with disabilities physical medical sensory or cognitive are equally at risk of utter neglect during and after disasters The Australian Agency for International Development estimates that 650 million people across the world have a disability and about 80 per cent of them live in developing countries Similarly before the January 2010 earthquake Haiti was a country with tremendous development needs and numerous impediments to development according to Congresswoman Maxine Waters when introducing a Resolution in the US House of Representatives to cancel Haiti s debts in March 2007 These impediments included an overwhelming burden of international debt lack of personal and community assets and very little or no internal

and external capacities all of which have been exacerbated by the aftermath of the earthquake It was against this background that the Center for Rebuilding Sustainable Communities after Disasters at the University of Massachusetts Boston organized two international Conferences in 2010 in April on Rebuilding Sustainable Communities in Haiti in the wake of the January Earthquake and in July on Rebuilding Sustainable Communities with the Elderly and Disabled People after Disasters This edited book consists of selected papers that were presented at these academic events The topics include Disaster Experiences of the Elderly and the Disabled in Nigeria The Vulnerability of Elderly People in the Aftermath of Earthquakes in Iran Methods for Assessing and Developing Understanding of Resiliency in Communities The Tuareg s traditional Shelter for Disaster Mitigation and Reconstruction in Libya and People with Disabilities in Haiti Before and After the 2010 Earthquake *Focus On: 100 Most Popular Station Wagons* Wikipedia contributors, *Biomedical Engineering Systems and Technologies* Ana Fred,Joaquim Filipe,Hugo Gamboa,2008-11-27 This book contains the best papers of the First International Joint Conference on Biomedical Engineering Systems and Technologies BIOSTEC 2008 organized by the Institute for Systems and Technologies of Information Control and Communication INSTICC technically co sponsored by the IEEE Engineering in Medicine and Biology Society EMB ACM SIGART and the Workflow Management Coalition WfMC in cooperation with AAAI The purpose of the International Joint Conference on Biomedical Engineering Systems and Technologies is to bring together researchers and practitioners including engineers biologists health professionals and informatics computer scientists interested in both theoretical advances and applications of information systems artificial intelligence signal processing electronics and other engineering tools in knowledge areas related to biology and medicine BIOSTEC is composed of three co located conferences each specializes in one of the aforementioned main knowledge areas namely BIODEVICES International Conference on Biomedical Electronics and vices focuses on aspects related to electronics and mechanical engineering specially equipment and materials inspired from biological systems and or dressing biological requirements Monitoring devices instrumentation sensors and systems biorobotics micro nanotechnologies and biomaterials are some of the technologies addressed at this conference *Word order variation in Italian and Spanish why-interrogatives* Svenja Krieger,2024-12-16 Questions that are introduced by the wh element why are special For instance in Italian and Spanish they allow the subject to occur in preverbal position in contrast to other wh interrogatives The overall goal of this book is to investigate the syntactic and discourse particularities of why interrogatives in Italian and Spanish More specifically based on a parallel corpus study and several experimental studies the factors that affect subject positioning in why interrogatives are determined In Italian focus plays a determining role while subject type and the heaviness of the subject affect its position in Spanish After discussing previous accounts that address the differences between the two languages an alternative approach is presented that builds on differences in the checking of the extended projection principle Additionally the special syntactic position of why is further supported by investigating a so far unnoticed intervening element in the

context of why interrogatives namely vocatives Finally subject positioning in Italian why interrogatives is examined in heritage bilingualism in order to contribute to the debate on the general vulnerability of the syntax discourse interface
